Introduction

1 Introduction

1.1 Welcome

Thank you for purchasing this machine.

This User's Guide describes the functions, operating instructions, precautions for correct operation, and simple troubleshooting guidelines of this machine. In order to obtain maximum performance from this product and use it effectively, please read this User's Guide as necessary.

1.1.1 User's guides

Printed manual	Overview	
[Quick Guide Copy/Print/Fax/Scan/Box Opera- tions]	 This manual describes operating procedures and the functions that are most frequently used in order to en able you to begin using this machine immediately. This manual contains notes and precautions that should be followed to ensure safe usage of this machine. Please be sure to read this manual before using this machine. This manual describes details on trademarks and copyrights. Trademarks and copyrights 	
User's guide DVD manuals	Overview	
[User's Guide Copy Operations]	 This manual describes details on copy mode operations and the settings of this machine. Specifications of originals and copy paper Copy function Maintaining this machine Troubleshooting 	
[User's Guide Enlarge Display Operations]	 This manual describes details on operating procedures of the enlarge display mode. Copy function Scanning function G3 fax function Network fax function 	
[User's Guide Print Operations]	This manual describes details on printer functions.Printer functionSetting the printer driver	
[User's Guide Box Operations]	 This manual describes details on the boxed functions using the hard disk. Saving data in user boxes Retrieving data from user boxes Transferring and printing data from user boxes 	
[User's Guide Network Scan/Fax/Network Fax Operations]	 This manual describes details on transmitting scanned data. E-mail TX, FTP TX, SMB TX, Save in User Box, WebDAV TX, Web Services G3 fax IP Address Fax, Internet Fax 	
[User's Guide Fax Driver Operations]	This manual describes details on the fax driver func-	

tion that transmits faxes directly from a computer.

[User's Guide Advanced Function Operations]	 This manual describes details on functions that become available by registering the optional license kit and by connecting to an application. Web browser function Image panel PDF Processing Function Searchable PDF My panel and My address functions

1.1.2 User's Guide

This User's Guide is intended for users ranging from those using this machine for the first time to administrators.

It describes basic operations, functions that enable more convenient operations, maintenance procedures, simple troubleshooting operations, and various setting methods of this machine.

Note that basic technical knowledge about the product is required to enable users to perform maintenance work or troubleshooting operations. Limit your maintenance and troubleshooting operations to the areas explained in this manual.

Should you experience any problems, please contact our service representative.

1.2 Conventions used in this manual

1.2.1 Symbols used in this manual

Symbols are used in this manual to express various types of information.

The following describes each symbol related to correct and safe usage of this machine.

To use this machine safely

▲ WARNING

This symbol indicates that a failure to heed the instructions may lead to death or serious injury.

▲ CAUTION

This symbol indicates that negligence of the instructions may lead to mishandling that may cause injury
or property damage.

NOTICE

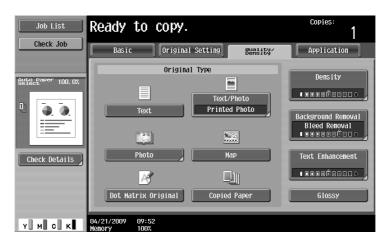

This symbol indicates a risk that may result in damage to this machine or documents. Follow the instructions to avoid property damage.

Procedural instruction

- ✓ This check mark indicates an option that is required in order to use conditions or functions that are prerequisite for a procedure.
- 1 This format number "1" represents the first step.
- 2 This format number represents the order of serial steps.
 - → This symbol indicates a supplementary explanation of a procedural instruction.

The operation procedures are described using illustrations.

This symbol indicates transition of the control panel to access a desired menu item.

This symbol indicates a desired page.

Reference

This symbol indicates a reference.

View the reference as required.

Key symbols

[]

Key names on the touch panel and computer screen, or manual names are indicated by these brackets. Bold text

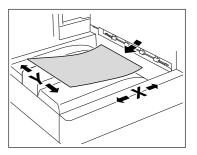

Key names, part names, product names and option names on the control panel are indicated in bold text.

1.2.2 Document and paper indications

Paper size

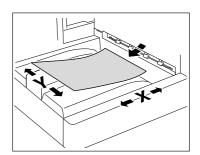

The following explains the indication for documents and paper described in this manual.

When indicating the document or paper size, the Y side represents the width and the X side the length.

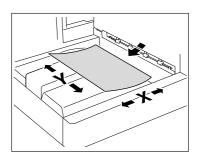

Paper indication

 $\hfill \hfill \hfill$

indicates the paper size with the length (X) being shorter than the width (Y).

2 Overview

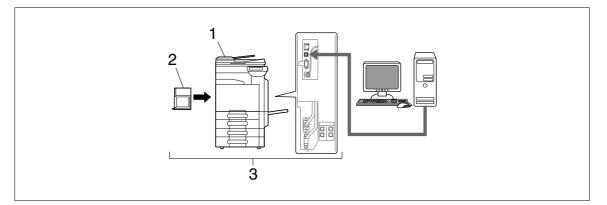

This chapter describes the overview and connection environment of the printer controller that provides the printer function.

2.1 Printer controller

The printer controller is a device that enables the printing and network printing functions on this machine.

2.1.1 Roles of the printer controller

Incorporating the printer controller enables this machine to function as a printing system, allowing printing using applications on the computer connected to this machine. When using this machine as a network printer, you can print using applications on the computer.

- 1. This machine
- 2. Printer controller
- 3. Printing system

The printer controller provides the following functions.

- Printing data sent from a printer driver on a computer
- Support of network protocols including TCP/IP (IPv4/IPv6), IPX/SPX, and AppleTalk
- Printing via a network using Web service (Windows Vista/Server 2008), SMB (Windows), LPR or IPP printing
- Configuring settings for this machine and the printer controller from a client computer via the network (using a Web browser)
- Control of the number of pages to be printed (the User Authentication and Account Track functions)
- Fax operations using a computer (PC-FAX transmission)

Reference

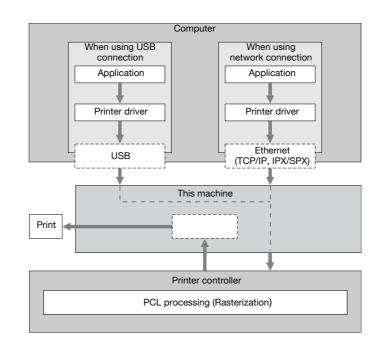

To use the fax function, the optional **Fax Kit** is required. For details on the PC-FAX transmission, refer to the [User's Guide Fax Driver Operations].

2.1.2 Flow of printing

The following outlines the flow of operations for using this printing system as a printer.

Print data sent from an application is received by the printer driver.

The data is sent to the machine via the USB interface for USB connection or via Ethernet (TCP/IP, IPX/SPX, AppleTalk) for network connection. Then the data is passed from the machine to the printer controller. The printer controller rasterizes images (expands output target characters and images to bitmap data). This data is printed from this machine.

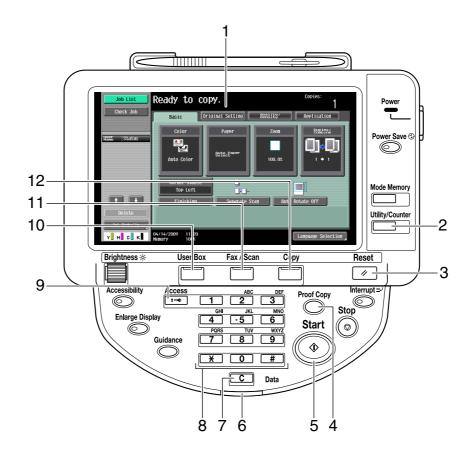

While this machine is operating as a printer, originals can be scanned using the copy function or network scan function. To use the copy function of this machine, press the **Copy** key on the control panel.

When a print job is received during copying, the data is stored in the memory of this machine. When the copying is completed, the print job is automatically printed.

2.1.3 Control panel

The printer driver settings are mainly configured on the computer. However, printing the font list and configuring the printer controller settings and default print settings are available using the control panel of this machine.

The following describes the important keys used for the printer function.

No.	Name	Description
1	Touch Panel	Various screens and messages are displayed. Configure various settings by directly pressing the touch panel.
2	Utility/Counter	Press this key to display the [Utility] screen and the Meter Count screen.
3	Reset	Press this key to reset all settings (except programmed set- tings) entered using the control panel or touch panel.
4	Proof Copy	Press this key to perform proof printing when a proof print job is stored.
5	Start	Press this key to start the operation of the selected function. When this machine is ready to begin the operation, the indi- cator on the Start key lights up in blue. If the indicator on the Start key lights up in orange, the operation cannot begin.
6	Data Indicator	Flashes in blue while a print job or fax is being received. Lights up in blue when a print job or fax is queued to be print- ed or while it is being printed.
7	C (clear)	Press this key to erase a value entered using the keypad or characters entered from the keyboard on the screen.
8	Keypad	Press to enter numbers. Use the keypad to enter the admin- istrator password or other setting values.

No.	Name	Description
9	Access	If user authentication and account track is enabled, press this key after entering the user name and password (for user au- thentication) or the account name and password (for account track) in order to use this machine.
10	User Box	Press this key to enter User Box mode. While the machine is in User Box mode, the indicator on the User Box key lights up in green. For details, refer to the [User's Guide Box Oper- ations].
11	Fax/Scan	Press this key to enter Fax/Scan mode. While the machine is in Fax/Scan mode, the indicator on the Fax/Scan key lights up in green. For details, refer to the [User's Guide Network Scan/Fax/Network Fax Operations].
12	Сору	Press this key to enter Copy mode (The machine is in Copy mode in default). While the machine is in Copy mode, the in- dicator on the Copy key lights up in green. For details, refer to the [User's Guide Copy Operations].

Reference

2

- The default print settings can be changed in the [Utility] mode.
- You can use this machine as a printer in either of User Box, Fax/Scan, and Copy modes.

Reference

For details on proof printing, refer to page 11-3.

2.2 Operating environment

This section describes the system requirements for using this printing system and the interfaces used for connection.

2.2.1 Connectable computers and operating system

Make sure that the computer to be connected meets the following conditions.

Windows

Windows

Operating system	The supported OS varies depending on the type of printer driver. For details, fer to page 3-4.	
CPU	Any processor of the same or higher specifications as recommended for your operating system	
Memory	Memory capacity as recommended for your operating system Sufficient memory resource is required for your operating system and the appli- cations to be used.	
Drive	DVD-ROM drive	

Macintosh

Macintosh

Operating system Mac OS 9.2/OS X (10.2.8, 10.3, 10.4, 10.5)		
CPU PowerPC, Intel Processor (Intel Processor must be Mac OS X 10.4/10.5 only)		
Memory	Memory capacity as recommended for your operating system	
Drive DVD-ROM drive		

2.2.2 Interfaces used for connection

To connect this printing system to a computer, the following interfaces can be used.

Ethernet

Use this interface to use this printing system via a network connection. It supports 1000Base-T, 100Base-TX, and 10Base-T standards. In addition, TCP/IP (LPD/LPR, IPP, SMB), Web services, IPX/SPX (NetWare), AppleTalk (EtherTalk) protocols are supported.

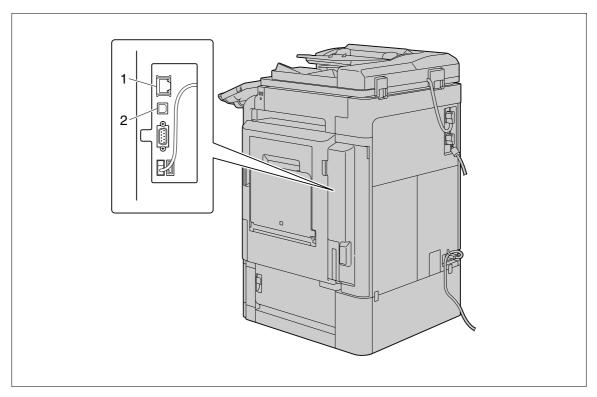

USB interface

Use this interface to use this printing system via a USB connection. The USB interface can be connected to a computer running Windows. A USB cable is required for connection. Use a type A (4 pin, male) or type B (4 pin, male) USB cable. A USB cable measuring three meters or less is recommended.

Connection diagram

The printer cables are connected to each port on this machine.

Back side of the machine

1. Ethernet port (1000Base-T/100Base-TX/10Base-T)

2. USB port

2.3 Setup procedure

To use this printing system, you must complete the setup in advance.

The setup refers to a series of procedures for connecting the machine to the computer and installing the printer driver to the computer.

Perform the setup using the following procedures.

2.3.1 For network connection

- 1 Connect this machine to the computer.
- 2 Check that the computer to be used is connected to the network.
- 3 Specify the IP address of this machine, and then connect it to the network.
- 4 Change the network settings for this machine according to the connection method or protocol.
 - → LPR: In [LPD Setting], enable LPD printing.
 - → Port9100: In [TCP/IP Settings], enable the RAW port number (initial setting: [9100]).
 - → SMB: Configure settings of [Print Settings] in [SMB Settings].
 - → IPP/IPPS: In [IPP Settings], enable IPP printing. To use IPPS printing, install the certificate in advance.
 - → Web Service Print: In [Web Service Settings], enable the print function.
 - → Bonjour: In [Bonjour Setting], enable Bonjour.
 - → AppleTalk: In [AppleTalk Settings], enable AppleTalk.
- 5 Install the printer driver.
 - → Specify the network port for the printer driver according to the connection method or protocol.
- 6 Install the screen fonts.
 - → The DVD-ROM contains the European TrueType fonts as "screen fonts". The "Screen Font" or "Screen Fonts" folder in the DVD-ROM contains the screen fonts.
 - → Install the screen fonts using the standard function for the OS of adding fonts. For details, refer to Help of the Operating System.
 - → Macintosh fonts are compressed. Decompress them before installing.

Reference

 After installing the printer driver, perform test print to make sure that the connections are made properly.

Reference

For details on the connectable interfaces, refer to page 2-8.

For details on the network settings, refer to the [User's Guide Network Administrator].

The procedure for installing the printer driver varies depending on the connection method, operating system of the computer, and printer driver. For details, refer to page 3-3.

To update an existing printer driver, uninstall it first. For details, refer to page 7-3.

Configure the interface timeout settings in the Utility menu on the control panel if necessary. For details, refer to page 12-53.

d-Color MF360/280/220

2.3.2 For local connection

- **1** Connect this machine to the computer.
- 2 Install the printer driver.
- 3 Install the screen fonts.
 - → The DVD-ROM contains the European TrueType fonts as "screen fonts". The "ScreenFont" or "Screen Fonts" folder in the DVD-ROM contains the screen fonts.
 - → Install the screen fonts using the standard function for the OS of adding fonts. For details, refer to Help of the Operating System.

3 Precautions for Installation

The following describes the information necessary for selecting a printer driver.

3.1 Introduction

This chapter describes the information you should keep in mind before installing the printer driver.

The procedure for installing the printer driver varies depending on how this machine is connected to the computer, operating system installed on the computer, and type of the printer driver to be installed.

To determine the printer driver to be installed and connection method, check the operating system of the computer and connection environment.

Select the installation method according to the printer driver and connection method.

3.2 Printer drivers compatible with respective operating systems

Before using this printing system, you must install the printer driver.

The following lists the printer drivers included on the DVD and the supported operating systems. Select the required printer driver.

Printer driver	Page de- scription lan- guage	Supported Operating Systems
PCL Driver (PCL driver)	PCL6	Windows NT Workstation Version 4.0 (Service Pack 6 or later) Windows NT Server Version 4.0 (Service Pack 6 or later) Windows 2000 Professional (Service Pack 4 or later) Windows 2000 Server (Service Pack 3 or later) Windows XP Home Edition (Service Pack 1 or later) Windows XP Professional (Service Pack 1 or later) Windows Server 2003, Standard Edition (Service Pack 1 or later) Windows Server 2003, Enterprise Edition (Service Pack 1 or later) Windows Server 2003 R2, Standard Edition Windows Server 2003 R2, Enterprise Edition Windows Server 2003 R2, Enterprise Edition Windows Server 2003, Standard ×64 Edition Windows Server 2003, Standard ×64 Edition Windows Server 2003 R2, Standard ×64 Edition Windows Server 2003 R2, Enterprise ×64 Edition Windows Server 2003 R2, Enterprise ×64 Edition Windows Vista Business * Windows Vista Home Basic * Windows Vista Home Premium Windows Vista Ultimate * Windows Server 2008 Standard * Windows Server 2008 Enterprise * Supports 32-bit (×86)/64-bit (×64) environment.
PostScript driver (PS driver)	PostScript 3 Emulation	Windows 2000 Professional (Service Pack 4 or later) Windows 2000 Server (Service Pack 3 or later) Windows XP Home Edition (Service Pack 1 or later) Windows XP Professional (Service Pack 1 or later) Windows Server 2003, Standard Edition (Service Pack 1 or later) Windows Server 2003 R2, Standard Edition Windows Server 2003 R2, Enterprise Edition Windows Server 2003 R2, Enterprise Edition Windows Server 2003 R2, Enterprise Edition Windows Server 2003, Standard ×64 Edition Windows Server 2003, Standard ×64 Edition Windows Server 2003, Enterprise ×64 Edition Windows Server 2003 R2, Enterprise ×64 Edition Windows Server 2003 R2, Enterprise ×64 Edition Windows Server 2003 R2, Enterprise ×64 Edition Windows Vista Business * Windows Vista Enterprise * Windows Vista Home Basic * Windows Vista Home Premium * Windows Vista Ultimate * Windows Server 2008 Standard * Windows Server 2008 Enterprise * Supports 32-bit (×86)/64-bit (×64) environment.
PostScript PPD driver (PS-PPD)		Mac OS 9.2 or later, Mac OS X 10.2.8/10.3/10.4/10.5
XPS Driver (XPS driver)	XPS	Windows Vista Business * Windows Vista Enterprise * Windows Vista Home Basic * Windows Vista Home Premium * Windows Vista Ultimate * Windows Server 2008 Standard * Windows Server 2008 Enterprise * * Supports 32-bit (×86)/64-bit (×64) environment.

Printer driver	Page de- scription lan- guage	Supported Operating Systems
Fax driver		Windows NT Workstation Version 4.0 (Service Pack 6 or later) Windows NT Server Version 4.0 (Service Pack 6 or later) Windows 2000 Professional (Service Pack 4 or later) Windows 2000 Server (Service Pack 3 or later) Windows XP Home Edition (Service Pack 1 or later) Windows XP Professional (Service Pack 1 or later) Windows Server 2003, Standard Edition (Service Pack 1 or later) Windows Server 2003, Enterprise Edition Windows Server 2003 R2, Standard Edition Windows Server 2003 R2, Enterprise Edition Windows Server 2003 R2, Enterprise Edition Windows Server 2003, Standard ×64 Edition Windows Server 2003, Enterprise ×64 Edition Windows Server 2003, Enterprise ×64 Edition Windows Server 2003 R2, Enterprise ×64 Edition Windows Server 2003 R2, Enterprise ×64 Edition Windows Vista Business * Windows Vista Business * Windows Vista Home Basic * Windows Vista Home Premium Windows Vista Ultimate * Windows Server 2008 Standard * Windows Server 2008 Enterprise * Supports 32-bit (×86)/64-bit (×64) environment.

Reference

- Select the page description language according to the application used for printing.
- Either of the installer or Add Printer Wizard can be used for installing the PCL driver, PS driver, and XPS driver for Windows.

Reference

For details on the fax drivers, refer to the [User's Guide Fax Driver Operations].

3.3 Connection methods selectable in each operating system

The connection method for this machine varies depending on the operating system of the computer. The printer driver installation method also varies depending on the connection method. This machine can be connected via a network or a USB interface. In network connection, the printer driver installation method varies depending on the protocol to be used.

Network connection (Ethernet):

This machine is connected as a network printer.

This printing system supports 1000Base-T, 100Base-TX, and 10Base-T standards. In addition, TCP/IP (LPD/LPR, IPP, SMB), IPX/SPX (NetWare), AppleTalk (EtherTalk) protocols are supported. The applicable protocols vary depending on the operating system of the computer.

USB interface:

This machine is connected as a local printer. The USB interface can be connected to a computer running Windows.

For USB connection, this manual covers only the plug and play based setup procedures.

3.3.1 Windows Vista/Server 2008

Setup procedures	Connection method		Reference page	
Connection meth- od in which install- er-based setup is possible	Port 9100	A network connection using the PORT9100 print service. It uses a TCP/IP protocol and the RAW printing port.	Select a connection method during instal- lation procedures. Select [Normal Print- ing] for the Port 9100 or USB connection method, or [Internet Printing] for the IPP connection method.	
	IPP	A network connection using the IPP (Internet Printing Protocol) print service. Printing via the In- ternet is possible with the HTTP (HyperText Transfer Protocol) of the TCP/IP protocol.		
	USB	A connection using a USB port.		
Connection meth- od in which setup is possible using Add Printer Wizard	LPR	A network connection using the LPR (Line Printer Remote) print service. It uses a TCP/IP protocol and the LPR printing port.	p. 4-3	
	Port9100	A network connection using the PORT9100 print service. It uses a TCP/IP protocol and the RAW printing port.		
	SMB	A network connection using SMB (Server Message Block) for shar- ing files or printers in Windows. It supports the TCP/IP protocol.		
	IPP/IPPS	A network connection using the IPP (Internet Printing Protocol) print service. Printing via the In- ternet is possible with the HTTP (HyperText Transfer Protocol) of the TCP/IP protocol. IPPS is an IPP for SSL encrypted communi- cation.		
	Web service print	It is a connection corresponding to Web Service function of Win- dows Vista/Server 2008 and ca- pable of automatically detecting the printer on the network.		
	USB	A connection using a USB port.		
Connection meth- od in which plug and play-based setup is possible	USB	A connection using a USB port.	p. 4-10	

d-Color MF360/280/220

Reference

• To use Windows Vista/Server 2008, log on to the computer using a user name with Administrator privileges, and then install the printer driver.

Reference

Before you can use this machine in the network environment, you must configure network settings for this machine. For details, refer to [User's Guide Network Administrator].

In Windows Vista/Server 2008, you cannot set up IPPS connection (Secure Print) using the installer. To use IPPS connection, use the Add Printer Wizard. For details, refer to page 4-6.

3.3.2 Windows 2000/XP/Server 2003

Setup procedures	Connection method		Reference page
Connection meth- od in which install- er-based setup is possible	Port9100	A network connection using the PORT9100 print service. It uses a TCP/IP protocol and the RAW printing port.	Select a connection method during instal- lation procedures. Select [Normal Print-
	IPP/IPPS	A network connection using the IPP (Internet Printing Protocol) print service. Printing via the In- ternet is possible with the HTTP (HyperText Transfer Protocol) of the TCP/IP protocol. Connection meth- od in which plug and play-based setup is possible	USB	A connection using a USB port.	Windows XP/ Server 2003: p. 4-16 Windows 2000: p. 4-21

Reference

- To use Windows 2000/XP/Server 2003, log on to the computer using a user name with the Administrator privileges, and then install the printer driver.
- The installer does not support installation in the IPv6 environment of Windows XP/Server 2003.

Reference

Before you can use this machine in the network environment, you must configure network settings for this machine. For details, refer to [User's Guide Network Administrator].

3.3.3 Windows NT 4.0

Setup procedures	Connection method		Reference page
Connection meth- od in which install- er-based setup is possible	Network con- nection	LPR	*Select a connection method during installa- tion procedures. Select [Normal Printing] for the LPR connection method.
Connection meth- od in which setup is possible using Add Printer Wizard	LPR	A network connection using the LPR print service.	р. 4-22

Reference

- When using Windows NT4.0, log on to the computer using a user name with the Administrator privilege, and then install the printer driver.
- In Windows NT4.0, to install the printer driver for this machine connected directly to the network using TCP/IP protocol, you must have the [Microsoft TCP/IP Printing] service installed in your computer.
- To use the installer in Windows NT4.0, you must have Internet Explorer 5.0 or later installed in your computer.

Reference

Before you can use this machine in the network environment, you must configure network settings for this machine. For details, refer to [User's Guide Network Administrator].

3.3.4 Mac OS X 10.2/10.3/10.4/10.5

Setup procedures	Connection method		Reference page
Connection meth- od in which setup is possible	Bonjour	A network connection using Bon- jour and Rendezvous.	 p. 5-3 Install your desired driver using the in- staller and specify the connection meth- od when selecting the printer.
	AppleTalk	A network connection using AppleTalk.	
	LPR	A network connection using the LPR print service.	
	IPP	A network connection using the IPP print service.	

Reference

Before you can use this machine in the network environment, you must configure network settings for this machine. For details, refer to [User's Guide Network Administrator].

3.3.5 Mac OS 9.2

Setup procedures	Connection method		Reference page
Connection meth- od in which setup	AppleTalk	A network connection using AppleTalk.	p. 5-13
is possible	LPR	A network connection using the LPR print service.	• Specify the connec- tion method when se- lecting a printer.

Reference

Before you can use this machine in the network environment, you must configure network settings for this machine. For details, refer to [User's Guide Network Administrator].

3.3.6 NetWare

NetWare version	Protocol used	Connection method
NetWare 4.x	IPX	Bindery Pserver Nprinter/Rprint- er
NetWare 5.x	IPX	NDS Pserver Nprinter/Rprinter
	TCP/IP	NDPS
NetWare 6.x	IPX	NDS Pserver
	TCP/IP	NDPS

Reference

For details on the NetWare functions, refer to the NetWare operation manual.

To use the machine in the NetWare environment, you must configure the network settings for the machine in advance. For details, refer to [User's Guide Network Administrator].

4 Manual Installation Using the Add Printer Wizard

This chapter describes the procedure for installing the Windows printer driver using the standard Windows Add Printer function, without using the installer.

4.1 Windows Vista/Server 2008

4.1.1 For network connection (LPR/Port 9100/SMB)

In Windows Vista/Server 2008, you can install the printer driver either by searching for the printer on the network, or by creating a new printer port.

Settings for the machine

Before using Port9100, LPR, or SMB printing, you must configure the network settings for the machine.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
RAW port number	To use Port9100 printing: In [TCP/IP Settings] for the machine, enable the RAW port number (initial setting: [9100]).
LPD Setting	To use LPR printing: In [LPD Setting] for the machine, enable LPD printing.
SMB Setting	To use SMB printing: At [Print Settings] in [SMB Settings] for the machine, specify NetBI- OS Name, Print Service Name, and Workgroup.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

To use SMB printing in the IPv6 environment, [Direct Hosting Setting] for the machine must be enabled. For details, refer to [User's Guide Network Administrator].

Installing the printer driver by searching for the printer using the Add Printer Wizard

- Installing the driver to Windows Vista/Server 2008-based computers requires the administrator authority.
- ✓ Since the printer is searched for during the installation, be sure to connect this machine to the network before turning it on.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Control Panel].
- **3** Click [Printers] under [Hardware and Sound].
 - The [Printers] window appears. → When [Control Panel] is displayed in Classic View, double-click [Printers].
- 4 Click [Add a printer] on the toolbar.

The [Add Printer] window appears.

5 Click [Add a network, wireless or Bluetooth printer].

Connected printers are detected.

- → If no printer is detected, turn this machine off, then on again. In this case, turn off the printer, and then wait approximately 10 seconds before turning it on again. If you turn this machine on immediately after turning it off, it may not function correctly.
- 6 Select your machine from the list, and then click [Next].
 - \rightarrow To use the LPR/Port9100 protocol, select the printer with its IP address.
 - → To use the SMB connection, select the printer with its "\\NetBIOS name\print service name".
 - → For the SMB connection, click [Next], and then click [OK] in the [Connect to Printer] page that appears.
 - \rightarrow It may take some time to finish searching the entire list of printers.
- 7 Click [Have Disk...].
- 8 Click [Browse...].
- 9 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver, XPS driver and fax driver
- **10** Click [OK].

The [Printers] list appears.

- **11** Click [Next].
 - → To use the SMB connection, click [OK].
- **12** Follow the instructions on the pages that follow.
 - → If the [User Account Control] window appears, click [Continue].
 - → If the [Windows Security] window for verifying the publisher appears, click [Install this driver software anyway].
- **13** Click [Finish].
- **14** After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.
- 15 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

Installing the printer driver by creating a printer port

- ✓ Installing the driver to Windows Vista/Server 2008-based computers requires the administrator authority.
- Since the printer is searched for during the installation, be sure to connect this machine to the network before turning it on.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Control Panel].
- Click [Printers] under [Hardware and Sound].
 The [Printers] window appears.
 → When [Control Panel] is displayed in Classic View, double-click [Printers].
- 4 Click [Add a printer] on the toolbar. The [Add Printer] window appears.
- 5 Click [Add a local printer].The page for [Choose a printer port] appears.
- 6 Click [Create a new port:], and then select the port type.
 - → To use the LPR/Port9100 protocol, select [Standard TCP/IP Port].
 - → To use the SMB connection, select [Local Port].
- 7 Click [Next].
- 8 Specify the IP address and port.
 - → To use the LPR/Port9100 protocol, select [TCP/IP Device], and then enter the IP address.
 - → To use the SMB connection, enter "\\NetBIOS name\print service name" in the [Port Name] box.
 - → Enter the same NetBIOS name and print service name specified in [Print Settings] in [SMB Settings].
- 9 Click [Next].
 - → If the [Additional Port Information Required] dialog box appears, go to Step 10.
 - → If the [Install the printer driver] dialog box appears, go to Step 13.
- 10 Select [Custom], and then click [Settings...].
- **11** Change the settings according to the port, and then click [OK].
 - → For LPR connection, select [LPR], and then enter "Print" in the [Queue Name:] box.
 - → You must discriminate between upper and lower case letters when entering it.
 - → For Port9100, select [Raw], and then enter a RAW port number (initial setting: [9100]) in the [Port Number:] box.
 - → If both LPR and Port9100 are enabled on this machine, the printer driver is connected to this machine using LPR.
- 12 Click [Next].

The [Install the printer driver] page appears.

- 13 Click [Have Disk...].
- 14 Click [Browse...].
- 15 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver, XPS driver and fax driver
- 16 Click [OK].

The [Printers] list appears.

- 17 Click [Next].
- **18** Follow the instructions on the pages that follow.
 - → If the [User Account Control] window appears, click [Continue].
 - → If the [Windows Security] window for verifying the publisher appears, click [Install this driver software anyway].
- **19** Click [Finish].
- 20 After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.
- 21 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

4.1.2 For network connection (IPP/IPPS)

Settings for the machine

To use IPP printing, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
IPP Setting	In [IPP Settings] for the machine, enable IPP printing.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

Before you can use IPPS printing, you must register a certificate with this machine. You can use the selfsigned certificate that is preinstalled in this machine. For details, refer to [User's Guide Network Administrator].

Installing the printer driver manually using the Add Printer Wizard

- ✓ Installing the driver to Windows Vista/Server 2008-based computers requires the administrator authority.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Control Panel].
- 3 Click [Printers] under [Hardware and Sound].

The [Printers] window appears.

- → When [Control Panel] is displayed in Classic View, double-click [Printers].
- 4 Click [Add a printer] on the toolbar. The [Add Printer] window appears.
- 5 Click [Add a network, wireless or Bluetooth printer].Connected printers are detected.
- 6 In the window showing the search result, click [The printer that I want isn't listed].

- 7 In the [Select a shared printer by name] box, enter the URL for the machine in the following format, and then click [Next].
 - → http://<IP address for the machine>/ipp Example: When the IP address for the machine is 192.168.1.20, http://192.168.1.20/ipp
 - → When specifying to use IPPS printing, enter "https://<host name>.<domain name>/ipp". <Host name>. For <domain name>, specify the host name and domain name registered for the DNS server being used.
 - → If the certificate for the machine is not the one issued by the certifying authority, you must register the certificate for the machine on the Windows Vista/Server 2008 system as the certificate by "Trusted Root Certification Authorities" for the computer account.
 - → When registering a certificate to the machine, confirm that <host name>.<domain name> is displayed as the common name of the certificate.
- 8 Click [Have Disk...].
- 9 Click [Browse...].
- 10 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver, XPS driver and fax driver
- **11** Click [OK].

The [Printers] list appears.

- 12 Click [OK].
- **13** Follow the instructions on the pages that follow.
 - → If the [User Account Control] window appears, click [Continue].
 - → If the [Windows Security] window for verifying the publisher appears, click [Install this driver software anyway].
- 14 Click [Finish].
- **15** After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.
- 16 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

Once the settings for the printer have been configured, you can use the printer in the same way as a general local printer.

4

4.1.3 For network connection (Web service print)

In Windows Vista/Server 2008, printers supporting the Web service print function on the network can be located and installed.

Reference

To install a different printer driver in the computer where one has already been installed, you must uninstall the currently installed one along with its package. For details, refer to page 7-3.

Settings for the machine

To use the Web service print, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
Web Service Settings	In [Web Service Settings] for the machine, enable the print function.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

Installing the printer from the Network window

- Installing the driver to Windows Vista/Server 2008-based computers requires the administrator authority.
- Turn on the power of the machine while it is connected to the network.
 Since the printer is searched for during the installation, be sure to connect the machine to the network.
- 2 To use the Web service print, check that [Network discovery] is enabled in [Network and Sharing Center] on the computer.
- 3 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 4 Press the [Start] key, and then select [Network].

The [Network] window appears, starting to search for the computers and devices on the network.

- 5 Select the device name of the machine, and then click [Install] on the toolbar.
 - → If the [User Account Control] window appears, click [Continue].

A printer compatible with the selected Web service print function is located, and then the [Found New Hardware] dialog box appears.

- 6 Follow the instructions on the pages that follow.
 - → If the [User Account Control] window appears, click [Continue].
 - → If the [Windows Security] window for verifying the publisher appears, click [Install this driver software anyway].

Reference

The operating steps in the [Found New Hardware] dialog box are the same as those described in "Installing the printer driver by specifying the IP address using the Add Printer Wizard". For details, refer to Steps 11 through 20 in the succeeding section.

Installing the printer driver by specifying the IP address using the Add Printer Wizard

- ✓ Installing the driver to Windows Vista/Server 2008-based computers requires the administrator authority.
- ✓ Since the printer is searched for during the installation, be sure to connect this machine to the network before turning it on.
- 1 Turn on the power of the machine while it is connected to the network. Since the printer is searched for during the installation, be sure to connect the machine to the network.
- 2 To use the Web service print, check that [Network discovery] is enabled in [Network and Sharing Center] on the computer.
- 3 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 4 Click [Start], and then select [Control Panel].
- 5 Click [Printers] under [Hardware and Sound].
 - The [Printers] window appears. → When [Control Panel] is displayed in Classic View, double-click [Printers].
- 6 Click [Add a printer] on the toolbar.The [Add Printer] window appears.
- Click [Add a local printer].The page for [Choose a printer port] appears.
- 8 Click [Create a new port:], and then select the port type.
 - → Select [Standard TCP/IP Port].
- 9 Click [Next].
- 10 Select [Web Services Device], enter the IP address, and click [Next].

A printer of the entered IP address that is compatible with the Web service print function is located, and then the [Found New Hardware] dialog box appears.

- 11 Click [Locate and install driver software (recommended)].
- 12 If a dialog box to confirm whether to search online appears, click [Don't search online].
- 13 Click [Browse my computer for driver software (advanced)].
- 14 Click [Browse...].
- 15 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver, XPS driver and fax driver
- 16 Click [Next].
- **17** Follow the instructions on the pages that follow.
 - → If the [User Account Control] window appears, click [Continue].
 - → If the [Windows Security] window for verifying the publisher appears, click [Install this driver software anyway].
- **18** Click [Close].
- **19** After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.

20 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

4.1.4 For local connection

When this machine is connected via a USB port, the printer driver can be installed with plug and play.

Reference

- When a USB connection is used, the printer driver is installed easily with the plug and play feature. However, it can also be installed using the Add Printer Wizard. To use the Add Printer Wizard, select the USB port to be connected in the [Choose a printer port] page.
- 1 Connect this machine to the computer using a USB cable, and then start the computer.

NOTICE

When starting up the computer, do not plug in or unplug the cable.

2 Turn on the main power of this machine.

The [Found New Hardware] dialog box appears.

- → If the [Found New Hardware] dialog box does not appear, turn this machine off, then on again. In this case, turn off this machine, and then wait approximately 10 seconds before turning it on again. If you turn this machine on immediately after turning it off, it may not function correctly.
- 3 Click [Locate and install driver software (recommended)].

The dialog box requesting the disk (DVD-ROM) appears.

- → If you do not have the disk (DVD-ROM), click [I don't have the disc, show me other options]. On the next page, select [Browse my computer for driver software (advanced)], and then specify a desired printer driver folder.
- → Select a folder according to the printer driver, operating system, and language to be used.
- 4 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.

The information on the disk is searched for, and then the list of the software supported by this machine appears.

- 5 Select a desired printer driver name, and then click [Next].
 - → Selectable printer drivers: PCL driver, PS driver, XPS driver and fax driver
- 6 Follow the instructions on the pages that follow.
 - → If the [User Account Control] window appears, click [Continue].
- 7 When the installation completes, click [Close].
- 8 After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.
 - → If the [Windows Security] window for verifying the publisher appears, click [Install this driver software anyway].
- 9 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

4.2.1 For network connection (LPR/Port9100)

To use LPR/Port9100 printing, specify the port while installing the printer driver.

Settings for the machine

To use Port9100 or LPR printing, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
RAW port number	To use Port9100 printing: In [TCP/IP Settings] for the machine, enable the RAW port number (initial setting: [9100]).
LPD Setting	To use LPR printing: In [LPD Setting] for the machine, enable LPD printing.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

Installing the printer driver manually using the Add Printer Wizard

- ✓ Installing the driver to Windows XP/Server 2003-based computers requires the administrator authority.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Printers and Faxes].
 - → If [Printers and Faxes]is not displayed in the [Start] menu, open [Control Panel] from the [Start] menu, click [Printers and Other Hardware], then click [Printers and Faxes].
- 3 In Windows XP, select [Add a printer] from the [Printer Tasks] menu. In Windows Server 2003, double-click [Add Printer].

[Add Printer Wizard] starts.

- 4 Click [Next >].
- 5 Select [Local printer attached to this computer], and then click [Next >].

→ Clear the [Automatically detect and install my Plug and Play printer] check box. The [Select a Printer Port] page appears.

- 6 Select [Create a new port:], and then select [Standard TCP/IP Port] as the [Type of port:].
- 7 Click [Next >].

[Add Standard TCP/IP Printer Port Wizard] starts.

- 8 Click [Next >].
- 9 In the [Printer Name or IP Address:] box, enter the IP address for the machine, and then click [Next >].
 - → If the [Additional Port Information Required] dialog box appears, go to Step 10.
 - → If the [Finish] screen appears, go to Step 13.
- 10 Select [Custom], and then click [Settings:].
- 11 Change the settings according to the port, and then click [OK].
 - → For LPR connection, select [LPR], and then enter "Print" in the [Queue Name:] box.
 - \rightarrow You must discriminate between upper and lower case letters when entering it.
 - → For Port9100, select [Raw], and then enter a RAW port number (initial setting: [9100]) in the [Port Number:] box.

12 Click [Next >].

4

13 Click [Finish].

[Add Printer Wizard] appears.

- 14 Click [Have Disk...].
- 15 Click [Browse...].
- 16 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver and fax driver
- **17** Click [OK].

The [Printers] list appears.

- **18** Click [Next >].
- 19 Follow the instructions on the pages that follow.
 - → To use a network connection, perform a test print after the network settings have been configured.
- 20 Click [Finish].
 - → If the "Windows logo testing" or [Digital Signature] window appears, click [Continue Anyway] or [Yes].
- 21 After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers and Faxes] window.
- 22 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

4.2.2 For network connection (SMB)

To use SMB printing, specify the port by specifying the printer while installing the printer driver. The printer can be specified either by searching for the printer on the network, or by entering the printer name directly.

Settings for the machine

To use SMB printing, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
SMB Setting	To use SMB printing: At [Print Settings] in [SMB Settings] for the machine, specify NetBI- OS Name, Print Service Name, and Workgroup.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

To use SMB printing in the IPv6 environment, [Direct Hosting Setting] for the machine must be enabled. For details, refer to [User's Guide Network Administrator].

Installing the printer driver by specifying the printer using the Add Printer Wizard

- ✔ Installing the driver to Windows XP/Server 2003-based computers requires the administrator authority.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Printers and Faxes].
 - → If [Printers and Faxes]is not displayed in the [Start] menu, open [Control Panel] from the [Start] menu, click [Printers and Other Hardware], then click [Printers and Faxes].
- 3 In Windows XP, select [Add a printer] from the [Printer Tasks] menu. In Windows Server 2003, double-click [Add Printer].

[Add Printer Wizard] starts.

- 4 Click [Next >].
- 5 Select [Local printer attached to this computer], and then click [Next >].

→ Clear the [Automatically detect and install my Plug and Play printer] check box. The page for [Select a Printer Port] appears.

- 6 Click [Create a new port:], select [Local Port] as the [Type of port:], and then click [Next >].
- 7 Enter "\\NetBIOS name\print service name" in the [Port Name] box.

→ Enter the same NetBIOS name and print service name specified in [Print Settings] in [SMB Settings].

8 Click [OK].

[Add Printer Wizard] appears.

9 Click [Have Disk...].

10 Click [Browse...].

4

- **11** Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver and fax driver
- 12 Click [OK].

The [Printers] list appears.

- 13 Click [Next >].
- **14** Follow the instructions on the pages that follow.
 - → To use a network connection, perform a test print after the network settings have been configured.
- 15 Click [Finish].
 - → If the "Windows logo testing" or [Digital Signature] window appears, click [Continue Anyway] or [Yes].
- 16 After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers and Faxes] window.
- 17 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

4.2.3 For network connection (IPP/IPPS)

To use IPP printing, specify the port while installing the printer driver.

Settings for the machine

To use IPP printing, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
IPP Setting	In [IPP Settings] for the machine, enable IPP printing.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

Before you can use IPPS printing, you must register a certificate with this machine. You can use the selfsigned certificate that is preinstalled in this machine. For details, refer to [User's Guide Network Administrator].

Installing the printer driver manually using the Add Printer Wizard

- ✔ Installing the driver to Windows XP/Server 2003-based computers requires the administrator authority.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Printers and Faxes].
 - → If [Printers and Faxes]is not displayed in the [Start] menu, open [Control Panel] from the [Start] menu, click [Printers and Other Hardware], then click [Printers and Faxes].
- 3 In Windows XP, select [Add a printer] from the [Printer Tasks] menu. In Windows Server 2003, double-click [Add Printer].

[Add Printer Wizard] starts.

- 4 Click [Next >].
- 5 In the [Local or Network Printer] page, select [A network printer, or a printer attached to another computer], and then click [Next >].
- 6 In the [Specify a Printer] page, select [Connect to a printer on the Internet or on a home or office network:].
- 7 In the [URL:] field, enter the URL for the machine in the following format, and then click [Next >].
 - → http://<IP address for the machine>/ipp Example: When the IP address for the machine is 192.168.1.20, http://192.168.1.20/ipp
 - \rightarrow When specifying to use IPPS printing, enter "https://<IP address for the machine>/ipp".
 - → If a confirmation dialog box appears after clicking [Next >], click [OK].
- 8 Click [Have Disk...].
- 9 Click [Browse...].
- 10 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver and fax driver
- **11** Click [OK].

The [Printers] list appears.

- **12** Click [OK].
- **13** Follow the instructions on the pages that follow.
- **14** Click [Finish].
 - → If the "Windows logo testing" or [Digital Signature] window appears, click [Continue Anyway] or [Yes].
- **15** After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers and Faxes] window.
- 16 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

Once the settings for the printer have been configured, you can use the printer in the same way as a general local printer.

4.2.4 For local connection

When this machine is connected via a USB port, the printer driver can be installed with plug and play.

Reference

- When a USB connection is used, the printer driver is installed easily with the plug and play feature. However, it can also be installed using the Add Printer Wizard. To use the Add Printer Wizard, select the USB port to be connected in the [Choose a printer port] page.
- 1 Connect this machine to the computer using a USB cable, and then start the computer.

NOTICE

When starting up the computer, do not plug in or unplug the cable.

- 2 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 3 Turn on the main power of this machine.

The [Found New Hardware Wizard] window appears.

- → If the [Found New Hardware Wizard] window does not appear, turn the machine off, then on again. In this case, turn off this machine, and then wait approximately 10 seconds before turning it on again. If you turn the printer on immediately after turning it off, it may not function correctly.
- → If a page with a message saying "Windows connect to Windows Update" appears, select ["No, not this time"].
- 4 Select [Install from a list or specific location (Advanced)], and then click [Next >].
- 5 Under [Search for the best driver in these locations.], select [Include this location in the search:], and then click [Browse].
- 6 Select a desired printer driver folder in the DVD-ROM, and then click [OK].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver and fax driver
- 7 Click [Next >], and then follow the instructions on the pages that follow.
- 8 Click [Finish].
 - → If the "Windows logo testing" or [Digital Signature] window appears, click [Continue Anyway] or [Yes].
- 9 After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers and Faxes] window.
- **10** Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

4.3 Windows 2000

4.3.1 For network connection (LPR/Port9100)

To use LPR/Port9100 printing, specify the port while installing the printer driver.

Settings for the machine

To use Port9100 or LPR printing, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
RAW port number	To use Port9100 printing: In [TCP/IP Settings] for the machine, enable the RAW port number (initial setting: [9100]).
LPD Setting	To use LPR printing: In [LPD Setting] for the machine, enable LPD printing.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

Installing the printer driver manually using the Add Printer Wizard

- ✔ Installing the driver to Windows 2000-based computers requires the administrator authority.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Settings] [Printers].
- 3 Double-click [Add Printer].

[Add Printer Wizard] starts.

- 4 Follow the instructions on the pages that follow.
- 5 On the window for specifying how the printer is attached, select [Local printer], and then click [Next >].
 → Clear the [Automatically detect and install my Plug and Play printer] check box. The page for [Select the Printer Port] appears.
- 6 Click [Create a new port:], and then select [Standard TCP/IP Port] as the type of port.
- 7 Click [Next >].

[Add Standard TCP/IP Printer Port Wizard] starts.

- 8 Click [Next >].
- 9 In the [Printer Name or IP Address:] box, enter the IP address for the machine, and then click [Next >].
 - → If the [Additional Port Information Required] dialog box appears, go to Step 10.
 - → If the [Finish] page appears, go to Step 13.
- **10** Select [Custom], and then click [Settings...].
- 11 Change the settings according to the port, and then click [OK].
 - → For LPR connection, select [LPR], and then enter "Print" in the [Queue Name:] box.
 - → You must discriminate between upper and lower case letters when entering it.
 - → For Port9100, select [Raw], and then enter a RAW port number (initial setting: [9100]) in the [Port Number:] box.
- **12** Click [Next >].

13 Click [Finish].

4

[Add Printer Wizard] appears.

- 14 Click [Have Disk...].
- 15 Click [Browse...].
- 16 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver and fax driver
- **17** Click [OK].

The [Printer:] list appears.

- 18 Click [Next >].
- 19 Follow the instructions on the pages that follow.
- 20 Click [Finish].
 - → If the [Digital Signature] window appears, click [Yes].
- 21 After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.
- 22 Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

4.3.2 For network connection (SMB)

To use SMB printing, specify the port by specifying the printer while installing the printer driver.

Settings for the machine

To use SMB printing, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
SMB Setting	To use SMB printing: At [Print Settings] in [SMB Settings] for the machine, specify NetBI- OS Name, Print Service Name, and Workgroup.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

Installing the printer driver manually using the Add Printer Wizard

- ✔ Installing the driver to Windows 2000-based computers requires the administrator authority.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Settings] [Printers].
- 3 Double-click [Add Printer]. [Add Printer Wizard] starts.
- 4 Follow the instructions on the pages that follow.

 On the window for specifying how the printer is attached, select [Local printer], and then click [Next >].
 → Clear the [Automatically detect and install my Plug and Play printer] check box. The page for [Select the Printer Port] appears.

6 Click [Create a new port:], and then select [Local Port] as the port type.

- 7 Click [Next >].
- 8 Enter "\\NetBIOS name\print service name" in the [Port Name] box.

→ Enter the same NetBIOS name and print service name specified in [Print Settings] in [SMB Settings].

- 9 Click [OK].[Add Printer Wizard] appears.
- 10 Click [Have Disk...].
- 11 Click [Browse...].
- 12 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver and fax driver
- **13** Click [OK].

The [Printer:] list appears.

- 14 Click [Next >].
- **15** Follow the instructions on the pages that follow.

16 Click [Finish].

4

- → If the [Digital Signature] window appears, click [Yes].
- **17** After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.
- **18** Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

4.3.3 For network connection (IPP/IPPS)

For IPP printing, configure the network settings before installing the printer driver.

Settings for the machine

To use IPP printing, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
IPP Setting	In [IPP Settings] for the machine, enable IPP printing.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

Before you can use IPPS printing, you must register a certificate with this machine. You can use the selfsigned certificate that is preinstalled in this machine. For details, refer to [User's Guide Network Administrator].

Installing the printer driver manually using the Add Printer Wizard

- Installing the driver to Windows 2000-based computers requires the administrator authority.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Settings] [Printers].
- 3 Double-click the [Add Printer] icon. [Add Printer Wizard] starts.
- 4 Click [Next].
- 5 In the [Local or Network Printer] page, select [Network printer], and then click [Next >].
- 6 In the [Locate Your Printer] page, select [Connect to a printer on the Internet or your intranet].
- 7 In the [URL:] field, enter the URL for the machine in the following format, and then click [Next].
 - → http://<IP address for the machine>/ipp Example: When the IP address for the machine is 192.168.1.20, http://192.168.1.20/ipp
 - → When specifying to use IPPS printing, enter "https://<IP address for the machine>/ipp".
- 8 When the confirmation dialog box appears, click [OK].
- 9 Click [Have Disk...].
- **10** Click [Browse...].
- **11** Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver and fax driver

12 Click [OK].

The [Printer:] list appears.

13 Click [OK].

- **14** Follow the instructions on the pages that follow.
- 15 Click [Finish].
 - → If the [Digital Signature] window appears, click [Yes].
- 16 After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.
- **17** Remove the DVD-ROM from the DVD-ROM drive.

This completes the printer driver installation.

Once the settings for the printer have been configured, you can use the printer in the same way as a general local printer.

4.3.4 For local connection

When this machine is connected via a USB port, the printer driver can be installed with plug and play.

Reference

- When a USB connection is used, the printer driver is installed easily with the plug and play feature. However, it can also be installed using the Add Printer Wizard. To use the Add Printer Wizard, select the USB port to be connected in the [Select the Printer Port] page.
- 1 Connect this machine to the computer using a USB cable, and then start the computer.

NOTICE

When starting up the computer, do not plug in or unplug the cable.

- 2 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 3 Turn on the main power of this machine.

The [Found New Hardware Wizard] window appears.

- → If the [Found New Hardware Wizard] window does not appear, turn the machine off, then on again. In this case, turn off this machine, and then wait approximately 10 seconds before turning it on again. If you turn the printer on immediately after turning it off, it may not function correctly.
- 4 Click [Next >].
- 5 Select [Search for a suitable driver for my device (recommended)], and then click [Next >].
- 6 Select [Specify a Location], and then click [Next >].
- 7 Click [Browse...].
- 8 Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: PCL driver, PS driver and fax driver
- 9 Click [OK], and then follow the instructions on the pages that follow.
- 10 Click [Finish].
 - → If the [Digital Signature] window appears, click [Yes].
- **11** After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.

12 Remove the DVD-ROM from the DVD-ROM drive. This completes the printer driver installation.

4.4 Windows NT 4.0

4

4.4.1 For network connection (LPR)

To use LPR printing, specify the port while installing the printer driver.

Settings for the machine

To use LPR printing, you must configure the network settings for the machine in advance.

Items to be configured	Description
IP address	In [TCP/IP Settings] of the machine, specify the IP address.
LPD Setting	To use LPR printing: In [LPD Setting] for the machine, enable LPD printing.

Reference

For details on the network settings for the machine, refer to the [User's Guide Network Administrator].

Installing the printer driver manually using the Add Printer Wizard

- ✓ Installing the driver to Windows NT 4.0-based computers requires the administrator authority.
- In Windows NT4.0, to use the LPR port, you must have the [Microsoft TCP/IP Printing] service installed in your computer.
- 1 Insert the printer driver DVD-ROM for Windows into the DVD-ROM drive of the computer.
- 2 Click [Start], and then select [Settings] [Printers].
- 3 Double-click the [Add Printer] icon. [Add Printer Wizard] starts.
- 4 On the page for specifying how the printer is attached, select [This computer].
- 5 Click [Next >].

A page for selecting a port appears.

- 6 Click [Add Port...].
- 7 From the [Available Printer Ports] list, select [LPR Port], and then click [New Port...].
- 8 Enter the IP address of the machine in the "Address" box, enter "Print" in the "Queue Name" box, and then click [OK].
 - → You must discriminate between upper and lower case letters when entering it.
- 9 Select the created port, and then click [Next >].
- 10 Click [Have Disk...].
- 11 Click [Browse...].
- **12** Select a desired printer driver folder in the DVD-ROM, and then click [Open].
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers:PCL driver and fax driver
- 13 Click [OK].

The [Printer:] list appears.

- **14** Click [Next >].
- **15** Follow the instructions on the pages that follow.
- 16 Click [Finish].
- 17 After finishing the installation, make sure that the icon for the installed printer is displayed in the [Printers] window.
- $18 \hspace{0.1 cm} \text{Remove the DVD-ROM from the DVD-ROM drive}.$

This completes the printer driver installation.

4

5 Installation on Macintosh Computers

This chapter describes the settings necessary when using Macintosh and the procedure for installing printer drivers for Macintosh.

5.1 Mac OS X 10.2/10.3/10.4/10.5

5.1.1 Installing the printer driver

- **1** Start the Macintosh computer.
- 2 Insert the printer driver DVD-ROM for Macintosh into the DVD-ROM drive of the computer.
 - → Exit all running applications, if any.
- **3** Open the folder in the DVD-ROM that contains the desired printer driver.
 - → Select a folder according to the printer driver, operating system, and language to be used.
- 4 Copy the driver file onto the desktop according to the Mac OS version.
 - → OS X 10.2: 36C-1_102.pkg
 - → OS X 10.3: 36C-1_103104.pkg
 - → OS X 10.4: 36C-1_103104.pkg
 - → OS X 10.5: 36C-1_105.pkg
 - → For OS X 10.5, the driver folder varies depending on the paper size. Select the appropriate driver folder for your environment.
 To use metric-based paper size (A4 and the like): Select a file in "WW_A4" folder.
 To use inch-based paper size (8 1/2 × 11 in letter size): Select "WW_Letter" folder.
- 5 Double-click the file copied onto the desktop.

The installer starts.

- → To cancel installation, press [Cancel].
- 6 Click [Continue] following the instructions on the pages that follow until the [Installation] page appears.
 - → When the name and password prompt appears during the procedure, enter the administrator name and password.
- 7 In the [Installation] page, click [Install].

The printer driver is installed in the computer. When the installation is completed, a message appears.

- → For OS X 10.2/10.3/10.4, when the printer driver is installed for the second and subsequent times, [Install] may change to [Upgrade].
- 8 Click [Close].

This completes the printer driver installation.

Next, select a printer.

5.1.2 Selecting and connecting a printer (OS X 10.4/10.5)

In OS X 10.4/10.5, the printer can be connected with Bonjour, AppleTalk, LPR (LPD), or IPP.

After configuring the network setting for the machine, selecting this machine as the printer to be used in the [Print & Fax] window enables printing.

Configuring the Bonjour settings

Configuring the [Bonjour Setting] for the machine

Enable Bonjour in [Bonjour Setting] for the machine, and then enter the Bonjour name.

Reference

For details on the [Bonjour Setting] for the machine, refer to the [User's Guide Network Administrator].

Adding a printer

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Print & Fax] icon.
- 3 Click [+] on the [Print & Fax] window.
- 4 Click [Default].

Connected printers are detected.

- → If no printer is detected, turn this machine off, then on again. In this case, turn off this machine, and then wait approximately 10 seconds before turning it on again. If you turn the printer on immediately after turning it off, it may not function correctly.
- 5 From the [Printer Name] list, select the desired Bonjour-connected model name.

The printer driver corresponding to the selected printer name is automatically selected.

- → After the printer driver is selected, go to Step 7.
- → If an incorrect printer driver is selected, go to Step 6.
- 6 Select the desired printer driver manually.
 - → When OS X 10.5 is used, select the [Select a driver to use...] from the [Print Using:], and then select the printer driver of the desired model name from the list.
 - → When OS X 10.4 is used, select [GENERIC] from the [Print Using:], and then select the printer driver of the desired model name from the list.
- 7 Click [Add].

When the selected printer is registered in the [Print & Fax], the setting procedure is completed.

→ If the [Installable Options] window appears, proceed to change the option settings as necessary. For details, refer to page 9-5.

Reference

• For OS X 10.4, you can also add a printer by clicking [Add] in the [Printer Setup Utility] window.

Configuring the [AppleTalk Settings] for the machine

Enable AppleTalk in [AppleTalk Settings], and then enter the printer name.

For details on the [AppleTalk Settings] for the machine, refer to the [User's Guide Network Administrator].

Configuring the [AppleTalk Settings] for the computer

Configure the AppleTalk settings for the Macintosh computer connected to the printer.

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Network] icon.
- 3 The Ethernet setting window appears.
 - → For OS X 10.5, select [Ethernet], and then click [Advanced...].
 - → For OS X 10.4, select [Built-in Ethernet], and then click [Configure...].
- 4 Double-click the [AppleTalk] tab to enable AppleTalk.
- 5 Click the close button at the top left corner of the window.
 - → When the [This service has unsaved changes] message appears, click [Apply].

Adding a printer

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Print & Fax] icon.
- 3 Click [+] on the [Print & Fax] window.
- 4 Click [Default].

Connected printers are detected.

- → If no printer is detected, turn this machine off, then on again. In this case, turn off this machine, and then wait approximately 10 seconds before turning it on again. If you turn the printer on immediately after turning it off, it may not function correctly.
- 5 From the [Printer Name] list, select the desired AppleTalk-connected model name.

The printer driver corresponding to the selected printer name is automatically selected.

- → After the printer driver is selected, go to Step 7.
- → If an incorrect printer driver is selected, go to Step 6.
- 6 Select the desired printer driver manually.
 - → When OS X 10.5 is used, select the [Select a driver to use...] from the [Print Using:], and then select the printer driver of the desired model name from the list.
 - → When OS X 10.4 is used, select [GENERIC] from the [Print Using:], and then select the printer driver of the desired model name from the list.
- 7 Click [Add].

When the selected printer is registered in the [Print & Fax], the setting procedure is completed.

→ If the [Installable Options] window appears, proceed to change the option settings as necessary. For details, refer to page 9-5.

Reference

• For OS X 10.4, you can also add a printer by clicking [Add] in the [Printer Setup Utility] window.

Configuring the LPR settings

[TCP/IP Settings] for the machine

Specify the IP address for the machine.

[LPD Setting] for the printer

Before using LPR printing, enable LPD printing in [LPD Setting] for the machine.

Reference

For details on specifying the IP address for the machine, refer to the [User's Guide Network Administrator]. For details on the [LPD Setting] for the machine, refer to the [User's Guide Network Administrator].

Configuring the TCP/IP settings for the computer

Configure the TCP/IP settings for the Macintosh computer connected to the printer.

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Network] icon.
- 3 The Ethernet setting window appears.
 - → For OS X 10.5, select [Ethernet], and then click [Advanced...].
 - → For OS X 10.4, select [Built-in Ethernet], and then click [Configure...].
- 4 Click the [TCP/IP] tab.
- 5 Configure the settings including the IP address and subnet mask according to the settings of the network to which the Macintosh computer is connected.
- 6 Click the close button at the top left corner of the window.
 - → When the [This service has unsaved changes] message appears, click [Apply].

Adding a printer

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Print & Fax] icon.
- Click [+] on the [Print & Fax] window.
- 4 Click [IP] or [IP Printer].
- 5 In [Protocol:], select [Line Printer Daemon LPD].
- 6 In [Address:], enter the IP address for the machine.

The printer driver corresponding to this machine being identified with its IP address is automatically selected.

- → After the printer driver is selected, go to Step 8.
- → If an incorrect printer driver is selected, go to Step 7.
- 7 Select the desired printer driver manually.
 - → When OS X 10.5 is used, select the [Select a driver to use...] from the [Print Using:], and then select the printer driver of the desired model name from the list.
 - → When OS X 10.4 is used, select [GENERIC] from the [Print Using:], and then select the printer driver of the desired model name from the list.
- 8 Click [Add].
 - When the selected printer is registered in the [Print & Fax], the setting procedure is completed.
 - → If the [Installable Options] window appears, proceed to change the option settings as necessary. For details, refer to page 9-5.

Reference

• For OS X 10.4, you can also add a printer by clicking [Add] in the [Printer Setup Utility] window.

Configuring the IPP settings

[TCP/IP Settings] for the machine

Specify the IP address for the machine.

[IPP Settings] for the machine

In [IPP Settings] for the machine, enable IPP printing.

Reference

For details on specifying the IP address for the machine, refer to the [User's Guide Network Administrator]. For details on the [IPP Settings] for the machine, refer to the [User's Guide Network Administrator].

Configuring the TCP/IP settings for the computer

Configure the TCP/IP settings for the Macintosh computer connected to the printer.

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Network] icon.
- 3 The Ethernet setting window appears.
 - → For OS X 10.5, select [Ethernet], and then click [Advanced...].
 - → For OS X 10.4, select [Built-in Ethernet], and then click [Configure...].
- 4 Click the [TCP/IP] tab.
- 5 Configure the settings including the IP address and subnet mask according to the settings of the network to which the Macintosh computer is connected.
- 6 Click the close button at the top left corner of the window.
 - → When the [This service has unsaved changes] message appears, click [Apply].

Adding a printer

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Print & Fax] icon.
- Click [+] on the [Print & Fax] window. [Printer Browser] appears.
- 4 Click [IP] or [IP Printer].
- 5 In [Protocol:], select [Internet Printing Protocol IPP].
- 6 In [Address:], enter the IP address for the machine. In [Queue:], enter "ipp".

The printer driver corresponding to this machine being identified with its IP address is automatically selected.

- → After the printer driver is selected, go to Step 8.
- → If an incorrect printer driver is selected, go to Step 7.
- 7 Select the desired printer driver manually.
 - → When OS X 10.5 is used, select the [Select a driver to use...] from the [Print Using:], and then select the printer driver of the desired model name from the list.
 - → When OS X 10.4 is used, select [GENERIC] from the [Print Using:], and then select the printer driver of the desired model name from the list.

d-Color MF360/280/220

8 Click [Add].

When the selected printer is registered in the [Print & Fax], the setting procedure is completed.

→ If the [Installable Options] window appears, proceed to change the option settings as necessary. For details, refer to page 9-5.

Reference

5

• For OS X 10.4, you can also add a printer by clicking [Add] in the [Printer Setup Utility] window.

5.1.3 Selecting and connecting a printer (OS X 10.2/10.3)

In OS X 10.2/10.3, the printer can be connected with Rendezvous, AppleTalk, LPR (LPD), or IPP.

After configuring the network setting for the machine, selecting this machine as the printer to be used in [Printer Setup Utility] or [Print Center] enables printing.

Configuring the Rendezvous settings

Configuring the [Bonjour Setting] for the machine

Enable Bonjour in [Bonjour Setting] for the machine, and then enter the Bonjour name.

Reference

For details on the [Bonjour Setting] for the machine, refer to the [User's Guide Network Administrator].

Adding a printer

- Select [Macintosh HD] [Applications] [Utilities] where the driver has been installed, and then doubleclick [Printer Setup Utility] or [Print Center] to open it.
- When the [You have no printers available.] window appears, click [Add]. When the [Printer List] appears, click [Add].
 - → If available printers have already been specified, the [You have no printers available.] window does not appear.
- 3 Select [Rendezvous] for the connection method.

Connected printers are detected.

- → If no printer is detected, turn this machine off, then on again. In this case, turn off this machine, and then wait approximately 10 seconds before turning it on again. If you turn the printer on immediately after turning it off, it may not function correctly.
- 4 From the [Name] list, select the desired model name.

The printer driver corresponding to the selected printer name is automatically selected.

- → After the printer driver is selected, go to Step 6.
- → If an incorrect printer driver is selected, go to Step 5.
- 5 Select the desired printer driver manually.
 - → From [Printer Model], select [GENERIC], and then select the desired model from the list of model names.
- 6 Click [Add].

When the selected printer is registered in the [Printer List], the setting procedure is completed.

5

Configuring the AppleTalk settings

Configuring the [AppleTalk Settings] for the machine

Enable AppleTalk in [AppleTalk Settings], and then enter the printer name.

Reference

For details on the [AppleTalk Settings] for the machine, refer to the [User's Guide Network Administrator].

Configuring the AppleTalk settings for the computer

Configure the AppleTalk settings for the Macintosh computer connected to the printer.

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Network] icon.
- 3 From [Show:], select [Built-in Ethernet].
- 4 Click the [AppleTalk] tab, and then select the [Make AppleTalk Active] check box.
- 5 Click the close button at the top left corner of the window.
 - → When the [This service has unsaved changes or Apply configuration changes] message appears, click [Apply].

Adding a printer

- Select [Macintosh HD] [Applications] [Utilities] where the driver has been installed, and then doubleclick [Printer Setup Utility] or [Print Center] to open it.
- 2 When the [You have no printers available.] window appears, click [Add]. When the printer list appears, click [Add].
 - → If available printers have already been specified, the [You have no printers available.] window does not appear.
- 3 Select [AppleTalk] for the connection method, and then select the zone to which the machine is connected.

Connected printers are detected.

- → If no printer is detected, turn this machine off, then on again. In this case, turn off this machine, and then wait approximately 10 seconds before turning it on again. If you turn the printer on immediately after turning it off, it may not function correctly.
- 4 From the [Name] list, select the desired model name.

The printer driver corresponding to the selected printer name is automatically selected.

- → After the printer driver is selected, go to Step 6.
- → If an incorrect printer driver is selected, go to Step 5.
- 5 Select the desired printer driver manually.
 - → From [Printer Model], select [GENERIC], and then select the desired model from the list of model names.
- 6 Click [Add].

When the selected printer is registered in the [Printer List], the setting procedure is completed.

Configuring the LPR settings

[TCP/IP Settings] for the machine

Specify the IP address for the machine.

[LPD Setting] for the printer

Before using LPR printing, enable LPD printing in [LPD Setting] for the machine.

Reference

For details on specifying the IP address for the machine, refer to the [User's Guide Network Administrator]. For details on the [LPD Setting] for the machine, refer to the [User's Guide Network Administrator].

Configuring the TCP/IP settings for the computer

Configure the TCP/IP settings for the Macintosh computer connected to the printer.

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Network] icon.
- 3 From [Show], select [Built-in Ethernet].
- 4 Click the [TCP/IP] tab.
- 5 Select the [Configure:] item and configure the settings including the IP address and subnet mask according to the settings for the network to which the Macintosh computer is connected.
- 6 Click the close button at the top left corner of the window.
 - → When the [This service has unsaved changes or Apply configuration changes] message appears, click [Apply].

Adding a printer

- 1 Select [Macintosh HD] [Applications] [Utilities] where the driver has been installed, and then doubleclick [Printer Setup Utility] or [Print Center] to open it.
- 2 When the [You have no printers available.] window appears, click [Add]. When the printer list appears, click [Add].
 - → If available printers have already been specified, the [You have no printers available.] window does not appear.
- 3 Select [IP Printing] for the connection method.
- 4 For OS X 10.3, select [LPD/LPR] for [Printer Type:].
- 5 In [Printer Address:], enter the IP address for the machine.
- 6 From [Printer Model], select [GENERIC], select the desired model from the list of model names, and then click [Add].

When the selected printer is registered in the [Printer List], the setting procedure is completed.

Configuring the IPP settings

[TCP/IP Settings] for the machine

Specify the IP address for the machine.

[IPP Settings] for the machine

In [IPP Settings] for the machine, enable IPP printing.

Reference

For details on specifying the IP address for the machine, refer to the [User's Guide Network Administrator]. For details on the [IPP Settings] for the machine, refer to the [User's Guide Network Administrator].

Configuring the TCP/IP settings for the computer

Configure the TCP/IP settings for the Macintosh computer connected to the printer.

- 1 In the [Apple Menu], select [System Preferences...].
- 2 Click the [Network] icon.
- 3 From [Show], select [Built-in Ethernet].
- 4 Click the [TCP/IP] tab.
- 5 Select the [Configure:] item and configure the settings including the IP address and subnet mask according to the settings for the network to which the Macintosh computer is connected.
- 6 Click the close button at the top left corner of the window.
 - → When the [This service has unsaved changes or Apply configuration changes] message appears, click [Apply].

Adding a printer

- Select [Macintosh HD] [Applications] [Utilities] where the driver has been installed, and then doubleclick [Printer Setup Utility] or [Print Center] to open it.
- 2 When the [You have no printers available.] window appears, click [Add]. When the printer list appears, click [Add].
 - → If available printers have already been specified, the [You have no printers available.] window does not appear.
- 3 Select [IP Printing] for the connection method.
- 4 For OS X 10.3, select [Internet Printing Protocol IPP] for [Printer Type:].
- 5 In [Printer Address:], enter the IP address for the machine.
 - → Leave [Queue Name:] blank.
- 6 From [Printer Model], select [GENERIC], select the desired model from the list of model names, and then click [Add].

When the selected printer is registered in the [Printer List], the setting procedure is completed.

5.2 Mac OS 9.2

5.2.1 Installing the printer driver

After being connected, this machine can be used as a printer by selecting a PostScript printer and specifying the "printer description (PPD) file".

First, copy the "printer description (PPD) file" to the computer.

- 1 Insert the printer driver DVD-ROM for Macintosh into the DVD-ROM drive of the computer.
- 2 Open the folder in the DVD-ROM that contains the desired printer driver.
 - → Select a folder according to the printer driver, operating system, and language to be used.
- 3 Select the PPD file "36C-1UVxxx.ppd", and copy it to [Macintosh HD] [System Folder] [Extension] -[Printer Descriptions] on the computer.

This completes the printer driver installation.

5.2.2 Selecting and connecting a printer

In OS 9, the printer can be connected using AppleTalk or LPR (LPD). Configure the network settings for the machine, and then select the printer.

Configuring the AppleTalk settings

Configuring the [AppleTalk Settings] for the machine Enable AppleTalk in [AppleTalk Settings], and then enter the printer name.

Reference

For details on the [AppleTalk Settings] for the machine, refer to the [User's Guide Network Administrator].

Configuring the AppleTalk settings for the computer

Configure the AppleTalk settings for the Macintosh computer connected to the printer.

- 1 In the [Apple Menu], select [Control Panels] [AppleTalk].
- 2 From [Connect via:], select [Ethernet].
- 3 Click the close button at the top left corner of the window.
 - → When the [Save changes to the current configuration?] message appears, click [Save].

Selecting a printer

- 1 In the [Apple Menu] menu, select [Chooser].
- 2 Make sure that [AppleTalk] is set to [Active], and then click the "LaserWriter" icon.
- 3 From the [Select a PostScript Printer:] list, click the desired model name, and then click [Create].

The window for selecting a PostScript printer description (PPD) file appears.

- → If a different PPD file has already been selected, click [Setup...] in Step 3, and then click [Select PPD...] from the window that is already displayed.
- 4 Click the applicable PPD file, and then click [Select] (or [Open]).

When the selected printer is registered in the [Chooser], the setting procedure is completed.

- → If the window showing the installable options appears, proceed to change the option settings as necessary. Go to Step 5.
- → If the [Chooser] window appears, go to Step 7.
- 5 Specify the options installed in the machine.

- Click [OK].
 The [Chooser] window appears again.
- 7 Close the [Chooser] window.

Configuring the LPR settings

[TCP/IP Settings] for the machine Specify the IP address for the machine. [LPD Setting] for the printer Before using LPR printing, enable LPD printing in [LPD Setting] for the machine.

Reference

For details on specifying the IP address for the machine, refer to the [User's Guide Network Administrator]. For details on the [LPD Setting] for the machine, refer to the [User's Guide Network Administrator].

Configuring the TCP/IP settings for the computer

Configure the TCP/IP settings for the Macintosh computer connected to the printer.

- 1 In the [Apple Menu], select [Control Panels] [TCP/IP].
- 2 From [Connect via:], select [Ethernet].
- 3 Select the [Configure:] item and configure the settings including the IP address and subnet mask according to the settings for the network to which the Macintosh computer is connected.
- 4 Click the close button at the top left corner of the window.
 - → When the [Save changes to the current configuration?] message appears, click [Save].

Adding a printer

1 Select [Macintosh HD] - [Applications (Mac OS 9)] - [Utilities], and then double-click [Desktop Printer Utility] to open it.

The [New Desktop Printer] window appears.

- 2 In [Printing:], select [LaserWriter].
- In [Create Desktop...], select [Printer (LPR)].
 The [Untitled] window appears.
- In [PostScriptTM Printer Description (PPD) File], click [Change...].
 The window for selecting a PostScript printer description (PPD) file appears.
- 5 Click the applicable PPD file, and then click [Select]. The [Untitled] window appears again.
- 6 Click [Change...] for [LPR Printer Selection].
 The window for entering the IP address appears.
- In [Printer Address:], enter the IP address of the machine, and then click [OK].
 The [Untitled] window appears again.
- 8 Click [Create...].The window for saving the settings appears.
- Enter the [Save desktop printer as], and then click [Save].An icon for the LPR printer is created on the desktop.

6 Installation when Using NetWare

This chapter describes the settings necessary when using NetWare and the procedure for installing printer drivers for the Windows client.

6.1 NetWare

6.1.1 Network Settings

In the [NetWare Settings] screen for the machine, specify [IPX Setting] and [NetWare Print Mode].

Reference

For details on the NetWare settings for the machine, refer to the [User's Guide Network Administrator].

6.1.2 Configuring the Windows client

For the Windows client that uses a printer, install the printer driver using the [Add Printer Wizard].

- ✓ Administrator authority is required for installation.
- 1 Insert the printer driver DVD for Windows into the DVD-ROM drive of the computer.
- 2 Open the [Printers] window or [Printers and Faxes] window.
- **3** Perform [Add a printer] or [Add Printer].

[Add Printer Wizard] starts.

- 4 In the port settings, browse the network and specify the name of the created queue (or NDPS printer name).
- 5 From the printer model list, specify the desired folder in the DVD-ROM that contains the printer driver.
 - → Select a folder according to the printer driver, operating system, and language to be used. Selectable printer drivers: Windows 2000/XP/Server 2003: PCL driver, PS driver Windows Vista/Server 2008: PCL driver, PS driver, XPS driver Windows NT4.0: PCL driver
- 6 Follow the instructions on the pages that follow to complete the installation.

Uninstalling the Printer Driver

7 Uninstalling the Printer Driver

This chapter describes the procedure for uninstalling the printer driver.

7.1 Windows

When you have to remove the printer driver, for example, when reinstallation of the printer driver is necessary, remove the driver using the following procedure.

- 1 Open the [Printers] window or [Printers and Faxes] window.
- 2 Select the icon for the printer to be uninstalled.
- **3** Press the [Delete] key on the computer to uninstall the printer driver.
- 4 From then on, follow the instructions on the pages that follow.

When the printer driver has been deleted, the icon disappears from the [Printers] or [Printers and Faxes] window.

In Windows NT 4.0, this completes the uninstallation process. Go to Step 10.

In Windows 2000/XP/Vista/Server 2003/Server 2008, go on to uninstall the printer driver from the server properties.

- 5 Open [Server Properties].
 - → In Windows Vista/Server 2008, right-click on the area that has nothing displayed in the [Printers] window, click [Run as administrator] [Server Properties].
 - → In Windows 2000/XP/Server 2003, click the [File] menu, then [Server Properties].
 - → If the [User Account Control] window appears, click [Continue].
- 6 Click the [Driver] tab.
- 7 From the [Installed printer drivers:] list, select the printer driver to be removed, and then click [Remove...].
 - → In Windows Vista/Server 2008, go to Step 8.
 - → In Windows 2000/XP/Server 2003, go to Step 9.
- 8 In the dialog box for confirming the items to be removed, select [Remove driver and driver package.], and then click [OK].
- 9 In the dialog box for confirming if you are sure to remove the printer, click [Yes].
 - → In Windows Vista/Server 2008, the dialog box appears to reconfirm if you are sure. Click [Uninstall].
- 10 Close the open windows, and then restart the computer.
 - → Be sure to restart the computer.

This completes removing the printer driver.

Reference

- In Windows 2000/XP/Server 2003, even if the printer driver is deleted using the preceding method, the model information file will remain in the computer. For this reason, when reinstalling the same version of the printer driver, the driver may not be rewritten. In this case, remove the following files as well.
- Check the "C:\WINDOWS\system32\spool\drivers\w32×86" folder ("C:\WIN-DOWS\system32\spool\drivers\x64" folder in the x64 system, and "C:\WINNT\system32\spool\drivers\w32×86" folder in Windows 2000), and if there is a folder (file described in "oem*.inf" shown below in Windows 2000) of the corresponding model, remove it. However, if multiple drivers are installed including the PCL driver, PostScript driver and fax driver, the model information of all drivers is deleted. To leave drivers other than the fax driver, do not remove the folder.

 From the "C:\WINDOWS\inf" folder ("C:\WINNT\inf" folder in Windows 2000), remove "oem*.inf" and "oem*.PNF" ("*" included in the file name indicates a number, which differs depending on the computer environment).

Before removing these files, open the inf file, and then check the model name described on the last few lines to confirm it is the file for the corresponding model. The number of the PNF file is the same as that of the inf file.

 In Windows Vista/Server 2008, this operation is not necessary if you have selected [Remove driver and driver package.].

7.2 Macintosh

When you have to remove the printer driver, for example, when reinstallation of the printer driver is necessary, remove the driver using the following procedure.

7.2.1 For Mac OS X

- 1 Open the [Print & Fax] (or [Printer Setup Utility]/[Print Center]) window.
 - → The [Print & Fax] window can be opened from the [System Preferences...] in the [Apple Menu] (OS X 10.3/10.4/10.5).
 - → The [Printer Setup Utility]/[Print Center] window can be opened from [Macintosh HD] [Applications]
 [Utilities] (OS X 10.2/10.3/10.4).
- 2 Select the printer name to be deleted, and then click [-] (or [Delete]).

The selected printer is deleted.

- Close the [Print & Fax] (or [Printer Setup Utility]/[Print Center]) window.
- 4 Drag the following installed files, which are located in [Macintosh HD] [Library] [Printers] [PPDs] [Contents] [Resources] ([Resources] [en.lproj] for OS X 10.2/10.3/10.4) to the [Trash] icon.
 - → [GENERIC36C-1.gz]
 - → [GENERIC28C-1.gz]
 - → [GENERIC22C-1.gz]
- 5 Delete unnecessary files from [Library] [Printers].
 - → Drag the [36C-1] folder, which is located in [Library] [Printers] [GENERIC], to the [Trash] icon.
 - → In addition, for Mac OS X 10.2, drag all the [36C-1] folders, which are located in [Library] [Printers]
 [PPDPlugins], to the [Trash] icon.
- 6 Restart the computer.

This completes removing the printer driver.

7.2.2 For Mac OS 9.2

- 1 Drag the printer icon on the desktop to the [Trash] icon.
- 2 Drag the PPD file "36C-1UVxxx.ppd", which is located in [Macintosh HD] [System Folder] [Extension] [Printer Descriptions], to the [Trash] icon.

The related printer driver files are deleted.

3 Restart the computer.

This completes removing the printer driver.

8 Print function of PCL/PS/XPS drivers for Windows

This chapter describes functions of the PCL/PS/XPS printer drivers for Windows.

8.1 Print operations

Print jobs are specified from the application software.

- Open the data in the application, and click [File]. Then click [Print] from the menu.[Print]
 → If the menu is not available, click [Print].
- 2 Check that the printer name has been selected in [Printer Name] (or [Select Printer]).
 - → If the printer is not selected, click to select the printer.
 - → The [Print] dialog box differs depending on the application.

eneral Options	
Select Printer

Selection Current Page	
Pages: 1	Collate
Enter either a single page number or a single page range. For example, 5-12	123 123
page range. For example, 3-12	

- 3 Specify the print range and the number of copies to print.
- 4 Click [Properties] (or [Preferences]) to change the printer driver settings as necessary.
 - → Clicking [Properties] or [Preferences] in the [Print] window displays the [Printing Preferences] page of the printer driver where you can configure various functions. For details, refer to page 8-9.
 - → [Printing Preferences] of the printer driver changed in the [Print] window are not saved, and the original settings are restored when you exit the application.
- 5 Click [Print].

Printing is executed and the data indicator of the machine flashes.

→ When [Secure Print Only] is set to [On] on [Device Option] of the [Configure] tab, [Secure Print] window appears. Go to Step 6.

6 Enter the ID and password of the document, and then click [OK].

Data is sent and saved in the [Secure Document User Box] of this machine.

	OK Cancel Default Help

Reference

8

For details on the [Configure] tab, refer to page 8-5.

For details on secure printing, refer to page 11-6.

8.2 Default settings of the printer driver

When you have installed the printer driver, you need to change the initialization conditions such as options, user authentication and account track functions and enable functions of the machine from the [Printing Preferences] window of the printer driver.

NOTICE

If the model name, installed options, user authentication and account track functions for the machine are not specified on the [Configure] tab, the option functions cannot be used from the [Printing Preferences] window of the printer driver. Be sure to configure the settings for the installed options.

8.2.1 Displaying the Properties window

- 1 Open the [Printers] window or [Printers and Faxes] window.
 - → In Windows Vista/Server 2008, click [Start], open [Control Panel], and then click [Printers] in [Hardware and Sound]. When [Control Panel] is displayed in Classic View, double-click [Printers].
 - → In Windows XP/Server 2003, click [Start], then [Printers and Faxes].
 - → In Windows XP/Server 2003, if [Printers and Faxes] is not displayed in the [Start] menu, open [Control Panel] from the [Start] menu, select [Printers and Other Hardware], then [Printers and Faxes]. When [Control Panel] is displayed in Classic View, double-click [Printers].
 - → In Windows 2000/NT 4.0, click [Start], and then select [Settings], then [Printers].
- 2 Right-click the icon of the installed printer, and click [Properties].

8.2.2 Configure tab

General Shar		vanced Color I	Management Security Configure Settings
			Device Option Setting C360 C360
· ·	y Information		Proof Top
Tray	Size	Direction	Faper Type

Pape	r Tray Settings		
Acquire	Device Information	n	Encrypt. Passphrase Software Tools Web Connection
Acc	uire Settings		Start
			OK Cancel Apply Help

Specify the model name used and presence or absence of the installed options, user authentication and account track functions, and then allow the printer driver to use the functions of the machine.

Item Name	Functions
[Device Option]	Configure the model name of the machine and the status of the installed printer options and user authentication/account track. Specify the status of each item in the [Setting] box.
[Paper Tray Information]	Displays the paper type assigned for each paper tray. Click [Paper Tray Settings] to configure the settings for each paper tray.
[Acquire Device Informa- tion]	Click this button to communicate with this machine and load the status of the installed options.
[Acquire Settings]	Click this button to configure conditions such as the destination when you perform [Acquire Device Information].

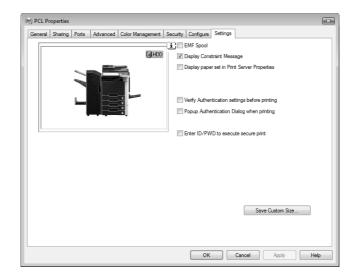

Item Name	Functions
[Encrypt. Passphrase]	Any string used to encrypt communication with this machine. If the encryption passphrase for the machine was changed from [Use Factory Default] to [User-Defined], enter the same encryption passphrase as for the machine. An encryption key is automatically created for the entered text, and used for communication with the machine.
[Software Tools]	Allows you to start up the software tools such as Web Connection.

- Be sure to select a model and options in [Device Option].
- When [Secure Print Only] is set to [On] in [Device Option], only the secure print jobs are allowed. For details on secure printing, refer to page 11-6.
- In [Encrypt. Passphrase], enter the encryption passphrase that matches the one that configured in [Driver Password Encryption Setting] of the machine.
- The function of [Acquire Device Information] is available only when your computer is connected to and can communicate with the machine.
- To use [Acquire Device Information], in [Administrator Settings] of this machine, set [System Connection] [OpenAPI Settings] [Authentication] to [OFF]. For details, refer to page 12-56.

Reference

For details on allowing the user to specify [Encrypt. Passphrase], refer to page 11-33.

8.2.3 Settings tab

The Settings tab allows you to change the default settings for displaying the confirmation messages or the window for entering the authentication settings.

Item Name	Functions
[EMF Spool]	Select this check box when meta file (EMF) spool is required for use in its own system environment.
[Display Constraint Mes- sage]	Select this check box to display the message when functions that cannot be configured simultaneously are enabled for the printer driver.
[Display paper set in Print Server Properties]	Select this check box to use forms added in the [Server Properties] dialog box of the Printers window.
[Verify Authentication settings before printing]	Select this check box to verify authentication settings for this machine before printing, and display the message if they are not satisfied.
[Popup Authentication Dialog when printing]	Select this check box to display the [User Authentication/Account Track] di- alog box when specifying printing, prompting entering the user name and ac- count name.

Item Name	Functions
[Enter ID/PWD to exe- cute secure print]	Select this check box to display the [Secure Print] dialog box prompting entry of ID and password when performing secure print.
[Save Custom Size]	Click this button to register custom paper sizes.

- [EMF Spool] and [Save Custom Size...] are functions available only for the PCL driver.
- To use the EMF spool function with a PS/XPS driver, select [Enable advanced printing features] in the [Advanced] tab to enable the EMF spool.

8.2.4 Registering the default settings

The settings for the machine functions configured when printing can only be applied while using the application. When you exit the application, the settings return to their default settings.

To register the settings, change the printer driver basic settings (default settings).

- 1 Open the [Printers] window or [Printers and Faxes] window.
 - → In Windows Vista/Server 2008, click [Start], open [Control Panel], and then click [Printers] in [Hardware and Sound]. When [Control Panel] is displayed in Classic View, double-click [Printers].
 - → In Windows XP/Server 2003, click [Start], then [Printers and Faxes].
 - → In Windows XP/Server 2003, if [Printers and Faxes] is not displayed in the [Start] menu, open [Control Panel] from the [Start] menu, select [Printers and Other Hardware], then [Printers and Faxes]. When [Control Panel] is displayed in Classic View, double-click [Printers].
 - → In Windows 2000/NT 4.0, click [Start], and then select [Settings], then [Printers].
- 2 Right-click the icon of the installed printer, and click [Printing Preferences...].

→ In Windows NT 4.0, right-click the icon of the installed printer, and then click [Document Defaults...]. The [Printing Preferences] dialog box of the printer appears.

3 Change the settings of the function, and then click [OK] to exit the function.

The changed settings are applied when the printer is used by all of the application software.

Reference

For details on the function and settings of the printer driver, refer to page 8-9.

The printer driver has the function to save the setting as a [Favorite Setting]. For details, refer to page 8-8.

8.3 Common Setting

8

This section describes the settings and buttons common to tabs.

🖶 Printing Preferences	×
💭 My Tab Basic Layout Finish Cover Mode	de Stamp/Composition Quality Other

	OK Cancel Help

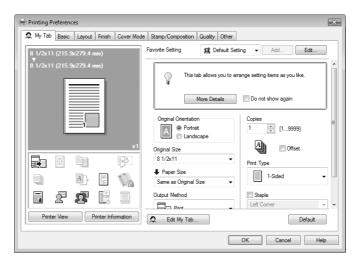

Item Name	Functions		
[OK]	Click this button to enable changed settings and close the properties win- dow.		
[Cancel]	Click this button to disable (cancel) changed settings and close the proper- ties window.		
[Help]	Click this button to display Help of the items in the displayed window.		
[Add] (Favorite Setting)	Click this button to save current settings so that they can be recalled later.		
[Edit](Favorite Setting)	Click this button to change saved settings.		
[Default]	Click this button to return to the default settings.		
View	Selecting [Paper View] displays the sample page layout based on current set- tings for checking the output result image. Selecting [Printer View] displays a printer figure showing the options installed in the machine such as the paper tray. Paper: $\begin{cases} 1/2x11 (215.9x279.4 \text{ mm}) \\ $ 1/2$		
[Printer Information]	Click this button to start Web Connection and check the printer information. This button is enabled only when your computer can communicate with this machine.		

8.4 Parameter details

The Printing Preferences window is the window to configure the printer driver functions. Click [Properties] (or [Preferences]) in the Print dialog box, or right-click the printer icon in the [Printers] or [Printers and Faxes] window, and then specify [Printing Preferences...] ([Document Defaults...] for Windows NT 4.0) to open it.

8.4.1 My Tab

My Tab allows you to customize the display contents. By registering frequently used setting functions to My Tab, the printer driver can be easier to use, and you can modify various settings from a single window.

Function Name	Option	Description
[More Details]	_	Click this button to display the Help of My Tab.
[Do not show again]	ON/OFF	Select this check box to hide the comment field con- taining [More Details] from the next time.
[Edit My Tab]	-	Click this button to register or delete the functions dis- played on My Tab. For details, refer to page 8-10.

Reference

• Items other than the above are customized on [Edit My Tab...], and the specific display contents vary depending on the registered contents.

Edit [My Tab]

8

- 1 On [My Tab], click [Edit My Tab...].
- 2 Select the function you want to register on [My Tab], and then click [to the LEFT] or [to the RIGHT].
 - → Select the desired function from those indicated in the respective tabs in [Setting Item List].
 - → Clicking [to the LEFT] places the selected function on the left side of [My Tab] and likewise clicking [to the RIGHT] places it on the right side of [My Tab].
 - → At the left of the functions currently registered to [My Tab], the icons indicating the [LEFT side]/[RIGHT side] appear.

Function Name	Option	Description
[Original Orienta- tion]	Portrait, Landscape	Select the orientation for the original.
[Original Size]	The paper sizes regis- tered as the standard pa- per sizes and custom sizes	Select the paper size of the original.
	Custom Size	Register custom sizes.
[Paper Size]	The paper sizes regis- tered as the standard pa- per sizes and custom sizes that can be used with the machine	Specify the output paper size. If it is different from the original size and the zoom is set to [Auto], the output image will be enlarged or reduced to fit the size.
	Custom Size	Register custom sizes.
[Zoom]	25 to 400%	Select an enlarge or reduce ratio.
[Paper Tray]	Auto, Tray 1 to Tray 4, LCT, Bypass Tray	Select a paper tray to be used. Selectable items vary depending on the option installa- tion status.
[Paper Type]	Paper types available for the machine	Select a paper type to be used for printing. It can be changed only when Paper Tray is set to [Auto]. When Paper Tray is not set to [Auto], the paper types registered in [Paper Settings for Each Tray] are availa- ble.

Function Name	Option	Description
[Output Method]	[Print]	Select this option to print immediately.
	[Secure Print]	Select this option to save the document to be printed in [Secure Document User Box] of the machine. When printing, entering the [ID] and [Password] is required from the control panel of the machine. Select this op- tion when printing highly confidential documents.
	[Save in User Box]	Select this option to save the document to be printed in a User Box of the machine.
	[Save in User Box/Print]	Select this option to save the document in a User Box and print at the same time.
	[Proof Print]	After one copy of the document is printed, the machine stops printing temporarily. Select this option to avoid misprinting a large volume of print jobs.
	[ID&Print]	Select this option to save the document to be printed in [ID & Print User Box] of the machine. When printing, user authentication must be performed via the control panel of the machine.
[User Settings]	-	Specify the ID and password, or the file name and User Box number when performing [Secure Print] or [Save in User Box].
[Authentica- tion/Account Track]	-	Click this button to specify the user name and pass- word when [User Authentication] is enabled on this ma- chine, or the account name and password when [Account Track] is enabled on this machine.
[Copies]	1 to 9999	Specify the number of copies to be printed.
[Collate]	ON/OFF	Select this check box to collate pages sequentially when printing multiple sets of copies.
[Offset]	ON/OFF	Select this check box to stagger each set when printing multiple sets of copies.
[Paper Settings for Each Tray]	[Paper Type Settings]	Select a paper tray to be specified. Selectable items vary depending on the option installa- tion status.
	[Paper Type]	Select the type of paper to be loaded onto the paper tray.

- Paper size "12 × 18" is equivalent to 304.8 × 457.2 mm that is slightly larger than A3.
- In [Original Size], you can select A0, A1, A2, B1, B2, or B3; however, the printing paper size is reduced to the size specified in [Paper Size]. [Same as Original Size] cannot be selected in [Paper Size].
- To use paper of which the size is other than the standard sizes, specify the custom paper size. You can register a custom size by selecting [Custom Size] from the paper size or original size option.
- To print data of the size corresponding to the full standard size, selecting "W" of the standard size paper for original size enables the data to be printed at the center of paper larger than the original size. For example, if you want to center and print 8-1/2 × 11 size data on 11 × 17 sized paper, create data with the "8-1/2 × 11W" size, and then, using the printer driver, set [Original Size] to [8-1/2 × 11W] and specify the paper tray to be used as [Paper Tray]. On the machine side, set 11 × 17 size paper in the tray to be used, select the tray in [Paper] of the [Basic] screen of the control panel, and select [Change Tray Settings] [Wide Paper] to specify [8-1/2 × 11W]. Then, confirm that [Auto Detect] is selected for [Custom Size] and 11 × 17 is displayed. When 12-1/4 × 18 paper is loaded, you must select [12-1/4 × 18] for [Custom Size]. To print on custom sized paper, use the bypass tray, select [Change Tray Settings] [Wide Paper] to specify [8-1/2 × 11W], and enter the desired paper size to be used for [Change Size].
 Specify [Side2] when printing on the back side of paper.
- [User] of Paper Type is the frequently used paper type registered on the machine side. For details on registering the user paper, refer to the [User's Guide Copy Operations].

For details on the paper sizes loadable in the paper trays, refer to the [User's Guide Copy Operations]. For details on the output method, refer to page 11-3.

8.4.3 [Layout] tab

Function Name	Option	Description
[Combination]	2 in 1, 4 in 1, 6 in 1, 9 in 1, 16 in 1, 2 × 2, 3 × 3, 4 × 4	Select any of the options to print multiple pages of the original on to one sheet or print information on one page of the original on to several sheets. In [Combination Details], specify the page order and use of the border frame.
[Combination De-	[Combination]	Select the combination condition.
tails]	[Layout Order]	Specify the layout order. It can be specified when N in 1 is specified for Combination.
	[Border]	Specify the presence and type of border lines. It can be specified when N in 1 is specified for Combination.
	[Overlap width line]	Specify the presence of overlap width line. It can be specified when $N \times N$ is specified for Combination.
[Rotate 180]	ON/OFF	Select this check box to rotate the document 180° to print.
[Skip Blank Pag- es]	ON/OFF	Select this check box to not print any blank pages.
[Chapters]	ON/OFF	Select this check box to specify the page to be printed on the front side. It can be specified when Print Type is [2-Sided] or [Booklet].
[Entry]	-	Specify the pages to be printed on the front side when [Chapters] is selected.
[Print Type]	[1-Sided], [2-Sided], [Booklet]	Specify 2-Sided Print or Booklet printing.
[Binding Position]	[Auto], [Left Bind], [Right Bind], [Top Bind]	Specify the binding position.
[Binding Margin]	ON/OFF	Select this check box to specify the binding margin. Click [Binding Margin Settings] to specify the margin values.

Function Name	Option	Description
[Binding Margin Settings]	[Shift Mode]	Select how to process the image to prepare the page margin.
	[Front Side]/[Back Side]	Specify the binding margin values. For 2-sided printing, clearing the [Same value for front and back sides] check box allows you to specify different values for the front and back sides.
	[Unit]	Select a unit to be used for specifying the size.
[Image Shift]	ON/OFF	Select this check box to print by shifting the entire print image. Click [Image Shift Settings] to specify the im- age shift values.
[Image Shift Set-	[Unit]	Select a unit to be used for specifying the size.
tings]	[Front Side]/[Back Side]	Specify the shift direction and values. For 2-sided print- ing, clearing the [Same value for Front and Back sides] check box allows you to specify different values for the front and back sides.

- The options "2 × 2, 3 × 3 and 4 × 4" for [Combination], which are for printing a sheet of original onto multiple sheets of paper, are available only for the PCL driver.
- The [Skip Blank Pages] function is available for the PCL/XPS drivers.
- The positions of binding margins vary according to the [Binding Position] setting.

[Edit]	-	For details, refer to page 8-22.
[Header/Footer]	Machine Setting 1 to Ma- chine Setting 20	Select this check box to print the header and footer. Select the header/footer from the list specified in the main unit. Clicking [Edit] allows you to specify items and pages to be printed.
[Edit]	[Acquire Device Informa- tion]	Select this option to communicate with the machine to read the header settings configured on the machine.
	[Distribution Control Number]	When printing multiple copies, this function prints the number of copies in the header/footer.
	[Edit]	Specify the distribution control number conditions.
	[Pages]	Specify the pages to be printed.
	[Text Color]	Specify the text color used for printing.

• [Print Device Image] of the [Overlay] function is available only for the PCL driver.

The function of [Acquire Device Information] is available only when your computer is connected to and can communicate with the machine.
 To use [Acquire Device Information], in [Administrator Settings] of the machine, set [System Connection] - [OpenAPI Settings] - [Authentication] to [OFF]. For details, refer to page 12-56.

Editing watermark

Function Name	Description
[Watermark Name]	Enter the name of the watermark. You can enter up to 30 characters.
[Watermark Text]	Enter the text to be printed as the watermark. You can enter up to 30 characters.
[Add]	Click this button to create a new watermark.
[Delete]	Click this button to delete the selected watermark.
[↑]/[↓]	Click the button to change the order of items displays in the list. This allows you to move the frequently used items upward.
[Position]	Select the vertical and lateral positions. You can specify the positions us- ing the scroll bars provided on the right of and under the image.
[Center]	Click this button to return the watermark back to the center position.
[Angle]	Specify the watermark print angle.
[Font Name]	Select the font.
[Size]	Select the size.
[Style]	Select the style.
[Frame]	Select the frame style.
[Text Color]	Specify the watermark text color.
[Transparent]	Select this check box to print the watermark in a transparent image.
[1st Page Only]	Select this check box to print the watermark only on the first page.
[Repeat]	Select this check box to print the watermark on one page repeatedly.
[Sharing]	Select this check box to register the watermark for sharing it with other users or clear this check box to register it for private use.

Editing overlay

The window to be displayed by clicking [Edit...] varies depending on the overlay selection ([Print Host Image] or [Print Device Image]).

When [Print Host Image] is selected:

You can specify the overlay printing conditions. When the overlay data does not appear in the list, read it by specifying the file.

Function Name	Option	Description
[Excel Job Con- trol]	ON/OFF	When multiple Microsoft Excel sheets with different page settings are printed at one time, the sheets may be separated into single-sheet jobs depending on the data contained. Select this check box to minimize such job separation.
[Remove White Background]	ON/OFF	When an overlay file is printed on top of Microsoft Pow- erPoint data, white areas are removed so that the white background of the PowerPoint data does not hide the overlay file. Clear this check box to print the original data as is without removing the background.
[Thin Line Sup- port]	ON/OFF	When printing with reduced size, thin lines may become blurred. Select this check box to prevent the thin lines from becoming blurred.
[Check Driver Version]	-	Click this button to display the printer driver version in- formation.

Reference

- The [Remove White Background] function is available for the PCL/XPS drivers.
- The [Thin Line Support] function is available only for the PCL driver.
- The [Excel Job Control] and [Remove White Background] settings are not available in Windows XP Professional ×64, Windows Vista ×64, Windows Server 2003 ×64, or Windows Server 2008 ×64.
- You can change the [Excel Job Control] setting only when the printer driver setting dialog is displayed from the [Printers] ([Printers and Faxes] in Windows XP/Server 2003) window.

9 Print Functions of Mac OS X

This chapter describes the functions of the PS printer driver for OS X.

9.1 Print operations

Print jobs are specified from the application software.

- Open the data in the application, and click [File]. Then click [Print] from the menu.
 → If the menu is not available, click [Print].
 The [Print] window appears.
- 2 Check that the desired printer name is selected in [Printer:].
 - → If the target printer is not selected, select it.

Printer:	xxxxxx	
Presets:	Standard	\$
(?) (PDF •	Preview	Cancel Print

- → If the printer does not appear, select the printer from [Print & Fax], [Printer Setup Utility] or [Print Center]. For details, refer to page 5-4 and page 5-9.
- → The [Print] window varies depending on the application software.

3 Specify the print range and the number of copies to print.

→ When the setting items are not displayed in OS X 10.5, click 💽 on the right side of [Printer:].

	Printer:	XXXXXX

		C	ancel Print	

- 4 Switch the setting window as necessary to change the printer driver settings.
 - → When you change the pop-up menu of the print options, another setting window of the printer driver appears, allowing you to configure various functions. For details, refer to page 9-10.
 - → The printer driver settings changed in the [Print] window are not saved, and the original settings are restored when you exit the application.
- 5 Click [Print].

Printing is executed and the data indicator of the machine flashes.

→ When [Secure Print Only] is selected in [Installable Options], the [Secure Print] window appears. Go to Step 6.

Ç

6 Enter the [Secure Print ID:] and [Password:] of the document, and then click [OK]. Data is sent and saved in the [Secure Document User Box] of this machine.

Secure Print ID:
Password:
Save Settings
Cancel OK

Reference

9

For details on [Installable Options], refer to page 9-5.

For details on [Secure Print], refer to page 11-6.

When you have installed the printer driver, you need to change the initialization conditions such as options and enable functions of the machine from the printer driver.

NOTICE

Any options that are installed in the machine but not configured ion the [Printer Info] tab cannot be used by the printer driver. Be sure to configure the settings for the installed options.

9.2.1 Option settings

- 1 Open the [Print & Fax] (or [Printer Setup Utility]/[Print Center]) window.
 - → The [Print & Fax] window can be opened from the [System Preferences...] in the [Apple Menu] (OS X 10.4/10.5).
 - → The [Printer Setup Utility]/[Print Center] window can be opened from [Macintosh HD] [Applications] - [Utilities].
- 2 Display the [Printer Info] window.
 - → For the [Print & Fax] window, click [Options & Supplies...] (OS X 10.5) or [Printer Setup...] (OS X 10.4).
 - → For the [Printer Setup Utility]/[Print Center] window, select [Show Info] of the [Printers] menu.
- 3 Display the [Installable Options] window.
 - → For Mac OS X 10.5, click [Driver].
 - → In OS X 10.2/10.3/10.4, select [Installable Options].
- 4 Specify the installed options.

5 Click [OK] or [Apply Changes], and then close the [Printer Info] window.

9.2.2 Registering the default settings

The settings for the machine functions configured when printing can only be applied while using the application. When you exit the application, the settings return to their default settings.

To register the settings, save the printer driver settings. For Mac OS X, you can register the paper setting as the default setting. Settings for other print functions can be saved using the [Presets] function and used by recalling them as necessary.

Settings configured in the [Page Setup] dialog box are saved by selecting [Save As Default] in [Settings:].

[Cancel]	Click this button to disable (cancel) changed settings and close the proper- ties window.
[Print]	Click this button to enable changed settings for printing.

Reference

9

• Clicking [Acquire Device Information] in the Printer Information window communicates with the machine and load the status of the installed options. This function is available only when your computer is connected to and can communicate with the machine.

9.4 Adding a custom size

To use paper of other than a standard size, register a custom paper size.

- 1 From the [File] menu, select [Page Setup] (or [Page Setup]).
- 2 Open the window for registering a custom size.
 - → For Mac OS X 10.4/10.5, select [Manage Custom Sizes...] from the Paper Size list.
 → For Mac OS X 10.2/10.3, select [Custom Paper Size] from [Settings:].
- 3 Click [+] (OS X 10.4/10.5) or [New] (OS X 10.2/10.3).
- 4 Enter the paper size name.

Be sure to use paper size names other than existing names, such as A4 and Custom.

- 5 Configure the following items.
 - → Page Size (Paper Size): Specify the paper size.
 - → Printer Margins: Specify the paper margins.

Cus	tom Page Sizes	;	
A4+	Page Size:	8.26 in Width	11.69 in Height
	Printer Margin	ns:	
	User defined	ł	÷
+ - Duplicate	0.25 in Left	0.25 in Top 0.57 in Bottom	0.25 in Right
0		Cancel	ОК

6 Click [OK] for OS X 10.4/10.5, or click [Save] for OS X 10.2/10.3.

This saves the custom paper size, which can be selected from the Paper Size drop-down list in [Page Attributes].

Reference

 For Mac OS X 10.5, you can also select [Manage Custom Sizes...] with [Paper Size:] in the [Print] window.

9.5 Parameter details

The printer driver functions are specified in the following windows: [Page Attributes] specified in the [Page Setup] window and [Output Method], [Layout / Finish], [Paper Tray / Output Tray], [Cover Mode / Transparency Interleave], [Per Page Setting], [Stamp / Composition] and [Quality] specified in the [Print] window.

9.5.1 [Page Attributes]

From the [File] menu, select in [Page Setup] (or [Page Setup]).

Settings:	Page Attributes	
Format for:	[\$
Paper Size:	8 1/2x11	\$
Orientation:	8.50 by 11.00 inches	
Scale:	100 %	
		ancel)

Function Name	Option	Description
[Paper Size:]	The paper sizes regis- tered as the standard pa- per sizes and custom sizes that can be used with the machine	Specify the output paper size.
	Manage Custom Sizes (OS X 10.4/10.5)	
[Orientation:]	Portrait, Landscape	Select the orientation for the original.
[Scale:]	(Varies depending on the version of OS X.))	Select an enlarge or reduce ratio.

Reference

- Paper size "12 × 18" is equivalent to 304.8 × 457.2 mm that is slightly larger than A3.
- To use paper of which the size is other than the standard sizes, specify the custom paper size. For details on registering the custom size, refer to page 9-9.
- To print data of the size corresponding to the full standard size, selecting "W" of the standard size paper for original size enables the data to be printed at the center of paper larger than the original size. For example, if you want to center and print 8-1/2 × 11 size data on 11 × 17 sized paper, create data with the "8-1/2 × 11W" size, and then, using the printer driver, set [Paper Size] to [8-1/2 × 11W] and specify the paper tray to be used as [Paper Tray]. On the machine side, set 11 × 17 size paper in the tray to be used, select the tray in [Paper] of the [Basic] screen of the control panel, and select [Change Tray Settings] [Wide Paper] to specify [8-1/2 × 11W]. Then, confirm that [Auto Detect] is selected for [Custom Size] and 11 × 17 is displayed. When 12-1/4 × 18 paper is loaded, you must select [12-1/4 × 18] for [Custom Size]. To print on custom sized paper, use the bypass tray, select [Change Tray Settings] [Wide Paper] to specify [8-1/2 × 11W], and enter the desired paper size to be used for [Change Size].
- For Mac OS X 10.5, you can specify [Paper Size] and [Orientation] also from the Print window.

Reference

For details on the paper sizes loadable in the paper trays, refer to the [User's Guide Copy Operations].

9.5.2 [Copies & Pages]

From the [File] menu, select in [Print] (or [Print]).

Presets:	Standard 🛟
Copies:	1 Collated
Pages:	From: 1 to: 1
Paper Size:	8 1/2x11 \$ 8.50 by 11.00 inches
Orientation:	
	TextEdit
	Print header and footer

Function Name	Option	Description
[Copies:]	1 to 9999	Specify the number of copies to be printed.
[Collated]	ON/OFF	Do not specify this function. Specify this function at [Collate] in [Output Method].
[Pages:]	-	Specify the page range to print.

Reference

- For OS X 10.5, [Paper Size:] and [Orientation:] are also displayed, but the function is the same as that available from [Page Attributes].
- When the setting items are not displayed in OS X 10.5, click I on the right side of [Printer:].

9.5.3 [Output Method]

	Output Method
Paper View Detailed Information	Collate
	Output Method:
• ■ = # %	User Authentication
Printer Information)	Detail Settings
	Default
	Cancel Print

Function Name	Option	Description
[Collate]	ON/OFF	Select this check box to collate pages sequentially when printing multiple sets of copies.
[Offset]	ON/OFF	Select this check box to stagger each set when printing multiple sets of copies.

d-Color MF360/280/220

Function Name	Option	Description
[Output Method:]	[Print]	Select this option to print immediately.
	[Secure Print]	Select this option to save the document to be printed in [Secure Document User Box] of the machine. When printing, entering the ID and password is required from the control panel of the machine. Select this option when printing highly confidential documents.
	[Save in User Box]	Select this option to save the document to be printed in a User Box of the machine.
	[Save in User Box and Print]	Select this option to save the document in a User Box and print at the same time.
	[Proof Print]	After one copy of the document is printed, the machine stops printing temporarily. Select this option to avoid misprinting a large volume of print jobs.
	[ID&Print]	Select this option to save the document to be printed in [ID & Print User Box] of the machine. When printing, user authentication must be performed via the control panel of the machine.
[User Authentica- tion]	-	Select this check box to specify the user name and password if [User Authentication] has been specified for the machine. Selecting this check box displays the setting window.
[Account Track]	-	Select this check box to specify the account name and password if [Account Track] has been specified for the machine. Selecting this check box displays the setting window.
[Detail Settings]	-	Click this button to display the window for configuring the detail settings.

For details on each print function in [Output Method:], refer to page 11-3.

Checking the [Output Method] detail settings

Clicking [Detail Settings...] displays the [Output Method:] functions for which detail settings can be specified.

Clicking [Expand All] displays the settings.

Selecting a function and clicking [Settings...] displays the window for specifying the detail settings for the selected function.

Function Name	Description
[Popup Authentication Dia- log when printing]	Select this check box to display the User Authentication, Account Track or Secure Print window when specifying printing, prompting entering the user name, account name, document ID and password.
[Encryption Passphrase:]	Any string used to encrypt communication with this machine. If the encryption passphrase for the machine was changed from [Use Fac- tory Default] to [User-Defined], enter the same encryption passphrase as for the machine. An encryption key is automatically created for the entered text, and used for communication with the machine.
[Enhanced Server:]	Set this item to [On] when the external server authentication is used.

Reference

9

• In [Encryption Passphrase:], enter the encryption passphrase that matches the one that configured in [Driver Password Encryption Setting] of the machine.

Reference

For details on allowing the user to specify [Encryption Passphrase:], refer to page 11-33.

Function Name	Description
[Copy Security:]	Select a function to prevent unauthorized copying. [Copy Protect]: Composes the specified text in the background before printing data. Copy Protect text is not highly visible when printing, but the text is highlighted when a document is copied illegally. [Repeatable Stamp]: Composes the specified text before printing data. This stamp is distinguishable even during printing. [Copy Guard]: Composes Copy Guard patterns before printing data. If a document is copied illegally on the machine that supports this function, the composed pattern is scanned, and the copying process is cancelled. [Password Copy]: Composes Password Copy patterns before printing da- ta. If a document is copied illegally on the machine that supports this func- tion, the composed pattern is scanned, and you are prompted to enter the password. To copy a document, enter the specified password when print- ing.
[Password:]	Enter the password for [Password Copy].
[Characters:]	Select this check box to embed the selected character string in a pattern. A preregistered character string (common stamp) or a character string registered in the machine (registered stamp) can be specified.

Function Name	Description
[Date/Time:]	Select this check box to embed the selected date and time in a pattern. Selecting from the drop-down list allows you to specify the display type and presence or absence of the time display.
[Serial Number]	Select this check box to embed the serial number of the machine in a pat- tern.
[Distribution Control Number:]	Select this check box to embed the copy number in a pattern when print- ing multiple copies. The start number or number of digits can be specified.
[Job Number]	Select this check box to embed the print job number in a pattern for doc- uments that are automatically paginated.

Function Name	Option	Description
[Select Color:]	[Auto Color], [Full Color], [Gray Scale]	Specify the color to be printed. [Auto Color]: Select this option to identify the colors used in the print data to use them in printing. [Full Color]: Select this option to print in full-color proc- esses (CMYK) regardless of the print data (color/gray scale). [Gray Scale]: Select this option to print in gray scale.
[Glossy Mode]	ON/OFF	Select this check box to print using a gloss finish.
[Toner Save]	ON/OFF	Select this check box to adjust the printing density in order to save the amount of toner consumed.

Function Name	Option	Description
[Edge Enhance- ment]	ON/OFF	Select this check box to enhance the edges of charac- ters, graphics and images so that thin lines and small letters become clearly visible.
[Color Settings:]	[Document], [Photo], [DTP], [Web], [CAD]	Select any of the options to print with a quality suitable for the selected original. [Document]: Select this option to print with a quality suitable for documents with many characters. [Photo]: Select this option to print with a quality suitable for photos. [DTP]: Select this option to print with a quality suitable for documents produced by DTP. [Web]: Select this option to print with a quality suitable for Web page printing. [CAD]: Select this option to print with a quality suitable for CAD data printing.
[Quality Adjust- ment]	-	Click this button to adjust the image quality. Adjust the text, photos, figures, tables, and graphs in each original. Profiles can also be managed here.
[Auto Trapping]	ON/OFF	Select this option to superimpose neighboring colors to print so as to prevent white space being generated around a picture.
[Black Over Print:]	Off, [Text], [Text/Figure]	Select this check box to superimpose black color on a neighboring color to print so as to prevent white space being generated around black characters or figures. You can specify to cause the overlapping on the char- acters alone or on characters and figures.

9

For details on managing the profile, refer to page 11-37 and page 11-39.

Print Functions of Mac OS 9.2

10 Print Functions of Mac OS 9.2

This chapter describes the functions of the printer driver for OS 9.2.

10.1 Print operations

Print jobs are specified from the application software.

- Open the data in the application, and click [File]. Then click [Print] from the menu.
 → If the menu is not available, click [Print].
 The [Print] window appears.
- 2 Check that the desired printer name is selected in [Printer:].
 - → If the target printer is not selected, select it.
 - → If the printer does not appear, select the printer from [Chooser]. For details, refer to page 5-13.
 - → The [Print] window varies depending on the application software.

Printer:	8.7.1 Destination: Printer 🖨
🛛 General 🔶 ——	
Copies: 1 🗹 Collated	
Pages: 🛞 All	
Q From: To	:
Paper Source: All pages from:	Auto Select 🔶
First page from:	Tray1 🗢
Remaining from:	Tray1 \$
Save Settings	Cancel Print

- 3 Specify the print range and the number of copies to print.
- 4 Switch the setting window as necessary to change the printer driver settings.
 - → When you change the menu of [General], another setting window of the printer driver appears, allowing you to configure various functions. For details, refer to page 10-6.
 - → The printer driver settings changed in the [Print] window are not saved, and the original settings are restored when you exit the application.
- 5 Click [Print].

Printing is executed and the data indicator of the machine flashes.

10.2 Default settings of the printer driver

When you have installed the printer driver, you need to change the initialization conditions such as options and enable functions of the machine from the printer driver.

NOTICE

Any options that are installed in the machine but not configured cannot be used by the printer driver. Be sure to configure the settings for the installed options.

10.2.1 Option settings

- 1 In the [Apple Menu] menu, select [Chooser].
- 2 Select the printer name.
- 3 Click [Setup...].
- 4 Click [Configure].

The option setting window appears.

Current Printer Description File (PPD) Selected: "XXXXXIV.x.x.ppd" Installable Options		
Paper Source Unit: PC-207 ↓ Finisher: FS-527+JS-603 ↓ Punch Unit: PK-517 (2/3-Hole) ↓ Saddle Kit: SD-509 ↓		
	Cancel OK	

- → When the printer is specified as the LPR printer, double-click the LPR printer icon on the desktop, click [Change Setup...] in the [Printer] menu to display the option setting window.
- 5 Specify the options installed in the machine.
- 6 Click [OK].

The [Chooser] window appears again.

7 Close the [Chooser] window.

Reference

The option settings are displayed automatically when the printer driver is selected for the first time. For details, refer to page 5-13.

10.2.2 Registering the default settings

The settings for the machine functions configured when printing can only be applied while using the application. When you exit the application, the settings return to their default settings.

To register the settings, save the printer driver settings. For OS 9.2, click [Save Settings] in the [Print] window to save the settings.

Printer:	8.7.1 Destination: Printer 😫

L	
Save Settings	Cancel Print

Reference

For details on the function and settings of the printer driver, refer to page 10-6.

Reference

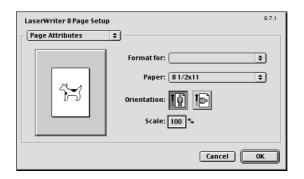

• The settings in the [Page Setup] dialog box cannot be saved.

10.3 Parameter details

The printer driver function settings can be configured in [Page Attributes] in the [Page Setup] dialog box or [Layout] or [Finishing Options] in the [Print] window.

10.3.1 Page Attributes

From the [File] menu, select in [Page Setup] (or [Page Setup]).

Function Name	Description
[Paper:]	Specify the output paper size.
[Orientation:]	Select the orientation for the original.
[Scale:]	Select an enlarge or reduce ratio.

Reference

• To use paper of which the size is other than the standard sizes, specify the custom paper size. For details on registering the custom size, refer to page 10-6.

10.3.2 Specifying the custom page sizes

Select [Custom Page Sizes] in the [Page Setup] dialog box.

- 1 From the [File] menu, select [Page Setup] (or [Page Setup]).
- 2 Select [Custom Page Sizes].
- 3 Click [New].
- 4 Configure the following items.

Paper Size Width: 0 Height: 0 Width offset: 0 Height offset: 0	Margins Top: 0 Left: 0Right: 0 Bottom: 0
Custom Page Size Name:	Custom Page Size 1
Units: inches 🜩	Cancel OK

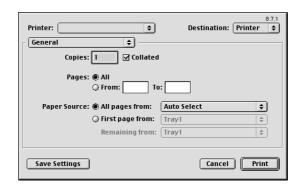

Function Name	Description
[Paper Size]	Specify the desired paper size.
[Margins]	Specify the paper margins.
[Custom Page Size Name]	Enter the registered name for the specified paper size or margins, and then click [OK].
[Units:]	Select the unit to specify the margins.

5 Click [OK].

This saves the custom page settings, which can be selected from the Paper drop-down list in [Page Attributes].

10.3.3 General

From the [File] menu, select in [Print].

Function Name	Description
[Copies:]	Specify the number of copies to be printed.
[Collated]	Select this check box to collate pages sequentially when printing multiple sets of copies.
[Pages:]	Specify the page range to print.
[Paper Source]	Select the paper tray and paper type to be used.

10.3.4 [Layout] (Combination)

Specify this item to print multiple pages on one page.

Printer:	\$ D	8.7.1 estination: Printer 🔶
Layout	•	
	Pages per sheet:	1 🔹
	Layout direction:	12 21
1	Border:	none 🗢
Save Settings		Cancel Print

Function Name	Description
[Pages per sheet:]	Multiple pages can be combined on a single page.
[Layout direction]	Specify the page combination order.
[Border:]	Specify the borders between pages.

10.3.5 Printer specific options (Finishing Option 1 to 5)

Specify the printer specific options. These options can be specified when functions of the machine such as stapling and punching are to be used.

Printer:	8.7.1 Destination: Printer 😫
Finishing Options 1	
Offset: Off 🜩	
Output Tray: Default 🗢	
Binding Position: Left Bind 😫	
Print Type: 1-Sided 🗢	
Combination: Off 🔶	
Staple: Off 🔶	
Punch: Off 🔶	
Save Settings	Cancel Print

Function Name	Description
[Offset:]	Specify offset.
[Output Tray:]	Select the output tray.
[Binding Position:]	Specify the binding position.
[Print Type:]	Perform 2-sided printing.
[Combination:]	Perform booklet printing.
[Staple:]	Perform stapling.
[Punch:]	Perform hole punching.
[Fold]	Perform folding.
[Front Cover:]	Select this option to attach a front cover page.
[Front Cover Tray:]	Select the paper tray for the front cover sheet.
[Back Cover:]	Select this option to attach a back cover page.
[Back Cover Tray:]	Select the paper tray for the back cover sheet.
[Transparency Interleave:]	Select the option to insert interleaves between transparencies.
[Interleave Tray:]	Select the paper tray for the transparency interleaves.
[Output Method:]	Specify the [Proof Print] function that pauses the printing after one copy of the document is output so that you can check how it is printed.
[Select Color:]	Select whether to print in color or gray scale.
[Glossy Mode:]	Select this check box to print using a gloss finish.
[Color Settings:]	Select any of the options to print with a quality suitable for the original.
[Auto Trapping:]	Select this option to superimpose neighboring colors to print so as to prevent white space being generated around a picture.
[Black Over Print:]	Select this check box to superimpose black color on a neighboring color to print so as to prevent white space being generated around black char- acters or figures. You can specify to cause the overlapping on the characters alone or on characters and figures.
[Color Matching (Text):]	Select this option to adjust the color quality of the text in the original.
[Pure Black (Text):]	Select whether to use (ON/OFF) the Pure Black function for the texts in the original.
[Screen (Text):]	Select whether to use screening for the texts in the original.
[Color Matching (Photo):]	Select this option to adjust the color quality of the photos in the original.
[Pure Black (Photo):]	Select whether to use (ON/OFF) the Pure Black function for the photos in the original.
[Screen (Photo):]	Select whether to use screening for the photos in the original.
[Smoothing (Photo):]	Select whether to use smoothing for the photos in the original.

Function Name	Description
[Color Matching (Graphic):]	Select this option to adjust the color quality of the figures, tables, or graphs in the original.
[Pure Black (Graphic):]	Select whether to use (ON/OFF) the Pure Black function for the figures, tables, or graphs in the original.
[Screen (Graphic):]	Select whether to use screening for the figures, tables, or graphs in the original.
[Smoothing (Graphic):]	Select whether to use smoothing for the figures, table, or graphs in the original.
[Toner Save:]	Select this check box to adjust the printing density in order to save the amount of toner consumed.
[Edge Enhancement:]	Select this check box to enhance the edges of characters, graphics and images so that thin lines and small letters become clearly visible.

Reference

- The [Staple:] function is available only if the optional **Finisher FS-527** or **Finisher FS-529** is installed.
- The [Punch:] function is available only when the **Punch Kit** is installed on the optional **Finisher FS-527**.
- The [Fold:] function is available only when the **Saddle Stitcher** is installed on the optional **Finisher FS-527**.

Function Details

11 Function Details

This chapter describes the functions that require special attention, for example, when combining the printer driver and panel operation of the machine.

11.1 Proof Print

The Proof Print function is a feature used when printing out multiple copies. It allows the printer to output one copy and pause the printing operation before printing the remaining number of copies. Because this function allows confirming the printed result before outputting the remaining copies, it is helpful in preventing misprinting when producing a large number of copies.

The Proof Print function can be specified using the printer driver when printing, and printing of the remaining number of copies can be performed from the control panel.

11.1.1 Setting the printer driver

The following five printer drivers support this feature.

- PCL Printer Driver for Windows (PCL driver)
- PostScript Printer Driver for Windows (PS driver)
- XPS Printer Driver for Windows (XPS driver)
- PostScript PPD Printer Driver for Mac OS X
- PostScript PPD Printer Driver for Mac OS 9.2

Perform printing with the following settings specified.

- Output Method: [Proof Copy]
- Number of Copies: Multiple sets

For Windows

- 1 Click to display the [Basic] tab.
- 2 Select [Proof Copy] in [Output Method].

Specify the desired number of copies and print.One copy is printed for checking.

For Mac OS X

11

- **1** Display the [Output Method] window.
- 2 Select [Proof Print] in [Output Method:].

Paper View Detailed Information	ut Method
8 1/2×11 8 1/2×11	✓ Collate ○ Offset
	Output Method: ✓ Print Secure Print Save in User Box Save in User Box and Print
Printer Information	Proof Print ID&Print 1905 Detail Settings
	Default
	(Cancel) (Print

- 3 Specify the desired number of copies and print.
 - One copy is printed for checking.
 - → In OS 9.2, the proof printing can be selected at [Output Method:] in [Finishing Options 3] screen.

11.1.2 Recalling a job from the control panel

Reference

- For details on the functions of the keys on the control panel, refer to the [User's Guide Copy Operations].
- 1 Press [Job List] on the control panel, and then press [Job Details].

Job List	Ready to co	ipy.		Copies: 1
Check Job	Basic	riginal Setting	Quality/ Density	Application
Neer Status	Color	Paper	Zoon	Dup Lex/ Combine
Nane Julius	Auto Color	Auto Paper Select	100. 0%

	Finishing	Separate Se	can Auto Re	otate OFF
Delete				
Job Details				
Y M C K	04/13/2009 14:13	- C asil		Language Selection

The Print window appears.

2 While [Current Jobs] is displayed, press [Release Held Job].

The [Release Held Job] screen appears.

- **3** From the job list, select the job you want to print.
 - → To print the remaining number of copies, continue with Step 6.
 - \rightarrow To change the printing conditions, continue with Step 4.

Job List	Select desired job to print and press [Start]. To copy 1 set for proofing, press [Proof Copy].				
	Release Held Job				
	No. MSH5 Status Document Name 5889ed Org. S885 11 PRINTER Stared Normalprint 13:23 1 1 Seesses				
Job Details	5%E ^c Set. 5%E ^c Set. Detail 10/06/2008 14:52				

- → If the job you want to release is not displayed, press [1] or [1] until the desired job is displayed. If an incorrect job was selected, touch the button for the selected job again to deselect it.
- 4 Press [Change Setting].

The [Change Setting] screen appears.

- → To check the results of setting changes, select the job whose sample copy is to be printed from the job list, and then press the **Proof Copy** key on the control panel. One copy is printed for checking. After performing the **Proof Copy** key, the original settings are restored. Configure the settings again as necessary.
- 5 Change the printing conditions in the [Change Setting] screen, and then press [OK].

The [Release Held Job] screen appears again.

- → To cancel releasing the held job, press [Cancel].
- 6 Press [OK] or the **Start** key in the control panel.

The stored job is changed to an active job, and then printed.

11.2 Secure Print

The Secure Print function saves print jobs in the Secure Print User Box of the machine. Because the job is output only by entering the ID and password from the control panel, it is helpful for outputting highly confidential documents.

The Secure Print function can be specified using the printer driver when printing, and printing can be performed from the control panel.

In order to prevent information leakage, you can restrict the printings done on this machine only to the secure printing.

Reference

For details on the function to limit to the secure printing only on the machine, refer to page 12-59.

For details on the printer driver settings for Windows, refer to page 8-5, and for Mac OS X, refer to page 9-5.

Reference

• When the secure printing is frequently used, it will be helpful to configure [Custom Display Settings] -[User Box Settings] of the machine so that [Secure Document User Box] always appears on the screen. For details, refer to the [User's Guide Box Operations].

11.2.1 Setting the printer driver

The following four printer drivers support this feature.

- PCL Printer Driver for Windows (PCL driver)
- PostScript Printer Driver for Windows (PS driver)
- XPS Printer Driver for Windows (XPS driver)
- PostScript PPD Printer Driver for Mac OS X

Perform printing with the following settings specified.

• Output Method: [Secure Print]

For Windows

- 1 Click to display the [Basic] tab.
- 2 Select [Secure Print] in [Output Method].

3 Enter the [Secure Print ID] and [Password].

	ype in [Secure Print ID] and [Password] that are

- → When [Password Rules] is enabled on the machine, the passwords that can be used for secure printing are limited. If a password that does not comply with the password rules is entered, the job is deleted. For details on the [Password Rules], refer to the [User's Guide Copy Operations].
- 4 Print the document.
 - → The ID and password required for secure printing can be registered in advance on [User Settings...] of the [Basic] tab. To use the same ID and password whenever you print, register them in advance so that the screen to prompt entering the ID and password does not appear when you select [Secure Print].

For Mac OS X

- 1 Display the [Output Method] window.
- 2 Select [Secure Print] in [Output Method].

Paper View	Dutput Method

3 Enter the [Secure Print ID:] and [Password;].

Secure Print
Secure Print ID: Password:
Save Settings
Default Cancel OK

- → Selecting the [Save Settings] check box saves the settings. In addition, if the [Do not show this window when setting] check box is selected, the dialog box does not appear when the function is specified.
- → When [Password Rules] is enabled on the machine, the passwords that can be used for secure printing are limited. If a password that does not comply with the password rules is entered, the job is deleted. For details on the [Password Rules], refer to the [User's Guide Copy Operations].
- 4 Print the document.

11.2.2 Recalling a job from the control panel

The [Secure Print] jobs are saved in the [Secure Document User Box]. To print a secured document, the ID and password that have been specified in the printer driver are required.

Reference

- Secured documents are automatically deleted after a certain length of time has elapsed since their registration. The default setting for this time is 1 day, and the value can be specified in the administrator mode. For details, refer to page 12-45.
- To manually delete a secured document that has been printed, operate in administrator mode. For details, refer to page 12-44.

Reference

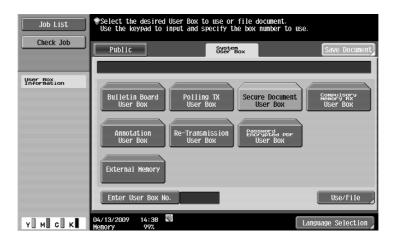

For details on the functions of the keys on the control panel, refer to the [User's Guide Copy Operations].

For details on the User Box functions of the machine, refer to the [User's Guide Box Operations].

For details on specifying the [Confidential Document Access Method], refer to the [User's Guide Copy Operations].

When the [Confidential Document Access Method] is set to [Mode 1]

- **1** Press the **User Box** key on the control panel.
 - → Press [User Box] when the application menu is displayed.
- 2 Select [Secure Document User Box] in [System User Box], and then press [Use/File].

3 Enter the [ID] for the secure print document, and then press [OK].

Enter the ID for the secure print document. To clear your entry, press the ICJ key.

- 8 Press [Start] or the **Start** key in the control panel.
 - → The document is printed.
 - → To stop operations, press [Cancel].

11.3 Save in User Box

The Save in User Box function saves print jobs in a User Box of the machine. Because the print jobs are printed by specifying the User Box from the control panel, this function can also be used for document distribution.

The Save in User Box function can be specified using the printer driver when printing, and printing or distribution can be performed from the control panel.

Reference

For details on the User Box functions of the machine, refer to the [User's Guide Box Operations].

11.3.1 Setting the printer driver

The following four printer drivers support this feature.

- PCL Printer Driver for Windows (PCL driver)
- PostScript Printer Driver for Windows (PS driver)
- XPS Printer Driver for Windows (XPS driver)
- PostScript PPD Printer Driver for Mac OS X

Perform printing with the following settings specified.

• Output Method: [Save in User Box] or [Save in User Box/Print]

Reference

• Create the User Box for saving the data in advance with the User Box function of the machine. For details on the User Box functions of the machine, refer to the [User's Guide Box Operations].

For Windows

- 1 Click to display the [Basic] tab.
- 2 Select [Save in User Box] or [Save in User Box/Print] in [Output Method].
 - → To save data in a User Box and print at the same time, select [Save in User Box/Print].

3 Enter the [File Name] of the document and the [User Box Number] for the save location.

11.3.2 Recalling a job from the control panel

The [Save in User Box] and [Save in User Box/Print] jobs are saved in a User Box of the specified number.

To print a document saved in a User Box, open the specified box to retrieve the document. If a password is specified for the User Box, the User Box password is required.

Reference

 User Box documents are automatically deleted after a certain length of time has elapsed since their registration. The default setting for this time is 1 day, and the value can be specified when creating a User Box.

Reference

For details on the functions of the keys on the control panel, refer to the [User's Guide Copy Operations].

For details on the User Box functions of the machine, refer to the [User's Guide Box Operations].

- Press the **User Box** key on the control panel.
 - → Press [User Box] when the application menu is displayed.
- 2 Select the desired User Box number, and then press [Use/File].

Boxes are classified as [Public] User Boxes, [Personal] User Boxes, or [Group] User Boxes. Specify the desired User Box from the classification of the saved User Boxes. The User Box number can be directly specified.

- → If a password is specified for the User Box, go to Step 3.
- → If a password is not specified for the User Box, go to Step 4.

When [User Authentication] is specified on the machine, a user name and password must be entered when printing.

The following four printer drivers support this feature.

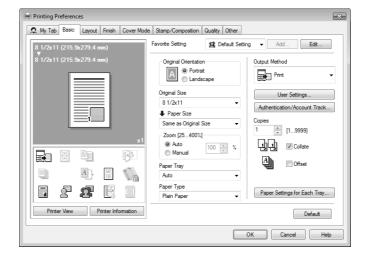

- PCL Printer Driver for Windows (PCL driver)
- PostScript Printer Driver for Windows (PS driver)
- XPS Printer Driver for Windows (XPS driver)
- PostScript PPD Printer Driver for Mac OS X

Reference

- If you enter an incorrect user name or password for the [User Authentication] settings of this machine or have not enabled [User Authentication], you will not be authenticated by this machine and the job will be discarded when printing.
- If an incorrect password is entered the specified number of times while [User Authentication] settings are configured on the machine and [Prohibited Functions When Authentication Error] is set to [Mode 2], the user may be locked and access to the machine may be blocked.
- Even a registered user cannot print a document if the user is not allowed to print. In addition, color printing is not available for a user who is not authorized for color printing. For user authentication, contact the administrator of the machine.
- Even when using an optional **Authentication Unit** for [User Authentication], enter the user name and password. For details, refer to the [User's Guide Copy Operations].

For Windows

- 1 Click to display the [Basic] tab.
- 2 Click [Authentication/Account Track...].

- 3 Select [Recipient User], and then enter a [User Name] and [Password] that are registered with the machine.
 - → The user name and password can each contain up to 64 characters.
 - → If [Public User] access is allowed on the printer, the printer can be used by [Public User].
 - → The password can also be specified in the printer driver in advance as the default value, and individual jobs do not require password entry.

Reference

- It is necessary to configure server settings when user authentication is performed with the server. Click [User Authentication Server Setting...], and then select a server.
- When authentication is performed with the Authentication Manager, in [Administrator Settings] of this machine, set [System Connection] – [OpenAPI Settings] – [Authentication] to [OFF]. For details, refer to page 12-56.

11.5 Printing a document on the machine for which Account Track function is enabled

When the [Account Track] settings are configured on the machine, you must enter the account track code (access code) when printing.

The following four printer drivers support this feature.

- PCL Printer Driver for Windows (PCL driver)
- PostScript Printer Driver for Windows (PS driver)
- XPS Printer Driver for Windows (XPS driver)
- PostScript PPD Printer Driver for Mac OS X

Reference

If you enter an incorrect access code for the [Account Track] settings on the machine or have not enabled [Account Track], you will not be authenticated by the printer and the job will be discarded when printing.

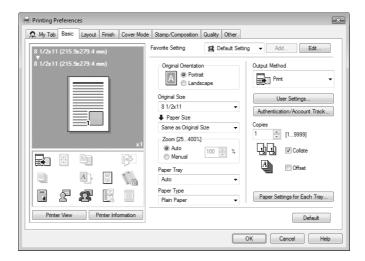

If an incorrect password is entered the specified number of times while the [Account Track] setting is configured on the machine and [Prohibited Functions When Authentication Error] is set to [Mode 2], the account will be locked and access to the machine will be blocked.

- Even a registered account cannot print a document if the account is not allowed to print. In addition, color printing is not available for a user who is not authorized for color printing.
- For account track, contact the administrator of the machine.

11.5.1 Setting the printer driver

For Windows

- 1 Click to display the [Basic] tab.
- 2 Click [Authentication/Account Track...].

- 3 Enter an [Department Name] and [Password] that are registered with the machine.
 - → The account name and password can each contain up to 8 characters.
 - → The password can also be specified in the printer driver in advance as the default value, and individual jobs do not require password entry.

- 4 Click [OK] to determine the settings and start printing.

If the entered access code is an access code enabled on the machine, the job is printed and counted as a job for the specified account.

d-Color MF360/280/220

11.6 ID & Print

When the ID & Print function is used, printing is started only after the user name and password entered from the control panel of the machine are accepted and the authentication process has been completed successfully. This is helpful in maintaining security of the document.

To use the ID & Print function, the user authentication must be completed on the machine.

When processing a print job from a computer, specify ID & Print after entering the user name and password from the printer driver.

Data to be printed in the ID & Print mode is saved in the [ID & Print User Box], and after printing, they are automatically deleted from the [ID & Print User Box]. You can also print the data saved in the [ID & Print User Box] by entering the user name and password from the control panel of the machine to log in to the printer.

When the optional Authentication Unit (biometric type) AU-101, Authentication Unit (biometric type) AU-102, or Authentication Unit (IC card type) AU-201 is used for [User Authentication], you can start printing or log in to this machine simply by touching the authentication unit with your finger or IC card.

Reference

To enable the ID & Print function when printing a document from the commuter, specify the function from the printer driver. For details, refer to page 11-23.

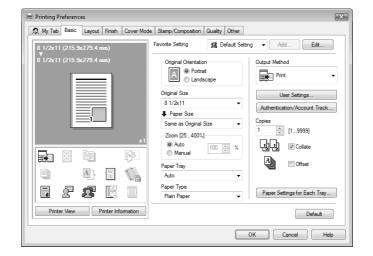

For details on the operation of the job saved in the [ID & Print User Box], refer to page 11-26.

For details on using the authentication unit for printing or logging in, refer to page 11-29.

11.6.1 Setting the printer driver

For Windows

- 1 Click to display the [Basic] tab.
- 2 Click [Authentication/Account Track...].

3 Select [Recipient User], enter the [User Name] and [Password] that are registered with the machine and click [OK].

Jser Authentication	Account Track

- 5 Print the document.

11.6.2 Recalling a job from the control panel

Reference

• For a public user, a document can be printed by opening the ID & Print User Box after logging in as a public user.

Entering the user information and printing

- 1 Enter the [User Name] and [Password] from the control panel of the printer.
 - → If the control panel shows a screen that appears after logging in, for example, when public user access is allowed without requiring to log in, logging out by pressing the Access key brings up a login screen.

TO Check document(s) prior ic	D & Print User Box, enter nen touch [Begin Printing]. printing, touch [Login].
Name Status User Name	
Password	
Delete Job Details Begin Printing	Print & Login

2 Press [Begin Printing].

Once the user is authenticated, the print job is printed.

- → Press [Print & Login] to enable printing of the job and normal login.
- → Press [Login] for the normal login without printing the job. After logging in, open the [ID & Print User Box] to print the document.
- → If there are multiple print jobs, all the jobs are printed. To select the documents to print, press [Login] and then print the desired documents from the [ID & Print User Box].
- → When the optional Authentication Unit is installed, [ID & PW] and [Auth. Unit] appear. By selecting a button, the ID & PW or authentication unit can be selected and used as the authentication method.

Printing a document by specifying it from the [ID & Print User Box]

Reference

- When the [ID & Print User Box] is frequently used, it will be helpful to configure [Custom Display Settings] - [User Box Settings] of the machine so that [ID & Print User Box] always appears on the screen. For details, refer to the [User's Guide Box Operations].
- 1 Enter the [User Name] and [Password] from the control panel of the printer.

The document is printed.

Reference

• When [System Settings] - [User Box Settings] - [ID & Print Delete after Print Setting] is set to [Confirm with User] in [Administrator Settings] of the machine, printing a document by specifying from [ID & Print User Box] displays the screen to confirm the deletion of the job. For details, refer to page 12-47.

Logging in using the authentication unit

1 Press [Auth. Unit], and then press [Begin Printing].

2 Touch the authentication unit with the finger or IC card.

Once the user is authenticated, the print job is printed.

- → Press [Print & Access] to enable printing of the job and a normal login.
- → Logging in by pressing [Access] allows you to log in as usual without printing a job. After logging in, open the [ID & Print User Box] to print the document.
- → If [ID & Print Operation Settings] is set to [Print All Jobs] when there are multiple jobs, all jobs are output in a single authentication. If it is set to [Print Each Job], the jobs are printed one by one in the order they have been stored.

Reference

- You can specify [ID & Print Operation Settings] in [User Authentication/Account Track] [User Authentication Settings] [Administrative Setting] [ID & Print Operation Setting] of the [Administrator Settings] of the machine. For details, refer to page 12-50.
- To select the documents to print when there are multiple print jobs, press [Access] and then print the desired documents from the [ID & Print User Box].
- Even when the authentication unit is installed, you can enter the user information and print using [ID & PW]. For details, refer to page 11-26.

Reference

• For details on the optional Authentication Unit, refer to the [User's Guide Copy Operations].

11.7 Printing from a cellular phone or PDA

Configure settings to wirelessly connect this machine to a cellular phone or PDA with the Bluetooth function installed and to print data stored in such a terminal or save it in a User Box of this machine.

11.7.1 Operating environment

The cellular phones and PDAs that can be connected to this machine and the printable file type must satisfy the following conditions.

Operating environment

Communication protocol	Bluetooth Ver. 2.0 + EDR
Supporting profile	OPP/BPP/SPP
Supporting file type	 PDF/XPS/TIFF/JPEG/XHTML/RepliGo For XHTML file types, the machine supports the character code of UTF-8/Shift-JIS/ISO-8859 and the link file extensions of JPEG/JPG/PNG. This machine supports RepliGo version 2.1.0.9.

Reference

- To print documents from a cellular phone or PDA, the optional **Local Interface Kit EK-605** is required. The settings for enabling a Bluetooth communication are also required. Contact your service representative in advance.
- If you cannot access the link file when attempting to print an XHTML file, the document will either not be printed or will be printed in a black frame depending on the setting in [User Settings] [Cellular Phone/PDA Setting] [Link File Error Notification]. For details, refer to page 12-35.
- To access the link file for printing an XHTML file, [WebDAV Settings] of this machine is required. To use a proxy for connection, register a proxy server in [Administrator Settings] [Network Settings] [WebDAV Settings] [WebDAV Client Settings] [Proxy Server Address], and set [User Settings] [Cellular Phone/PDA Setting] [Proxy Server Use] to [ON]. For details, refer to page 12-36.
- The communication speed may drop or communication may be interrupted due to obstacles, signal quality, magnetic field or static electricity.
- Protected documents and image data may not be sent depending on the security setting of the cellular phone or PDA.

11.7.2 Printing a document

Reference

- To print from a cellular phone or PDA, set [Administrator Settings] [System Connection] [Cellular Phone/PDA Setting] to [Allow] in advance. For details, refer to page 12-57. To use a Bluetooth communication, [Bluetooth Setting] must be enabled in this machine. For details, refer to the [User's Guide Network Administrator].
- When [User Authentication] is specified on this machine, even a registered user cannot print a document unless printing from a cellular phone or PDA is allowed in the machine setting. For user authentication, contact the administrator of the machine.
- For details on the User Box functions of the machine, refer to the [User's Guide Box Operations].
- For the operation of a cellular phone or PDA, refer to the operation manual of the cellular phone or PDA.
- 1 Set the cellular phone or PDA to enable Bluetooth communication.
- 2 Press the **User Box** key on the control panel.
 - → Press [User Box] when the application menu is displayed.

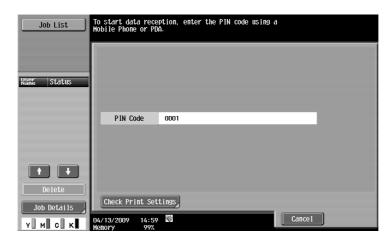

3 Select [Mobile/PDA] in [System User Box], and press [Use/File].

- 4 Press [Print List].
 - → To save data in a User Box, press [Save in User Box], and select the desired User Box.

Job List	Select an operation.
Check Job	Mobile/PDA
Heer Boxion	A file received from a mobile phone or PDA can be printed.
	A file received from a mobile phone or PDA can be saved in a User Box.
у м с к	04/13/2009 14:59 Cancel

5 Check the displayed PIN code.

- 6 Select this machine in the cellular phone or PDA.
 - → Select the data you want to send if it is selectable.
- 7 Enter the 4-digit PIN code into the cellular phone or PDA.

→ You can check the print setting in [Check Print Settings].

Once the PIN code is verified, connection is established and data transmission and printing start.

Reference

You can configure print settings from the cellular phone or PDA in [User Setting] – [Cellular Phone/PDA Setting] – [Print]. For details, refer to page 12-38.

11.8 Specifying the encryption passphrase by the user

The machine and the printer driver communicate with each other by encrypting a user password, account password or secure document password using a common encryption key.

Although an encryption passphrase for generating the common encryption key is preset as a default setting, it can also be generated with a user-defined encryption passphrase.

To specify a user-defined encryption passphrase, specify the same encryption passphrase both for the machine and the printer driver.

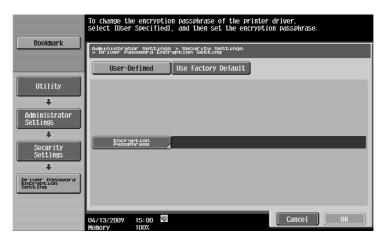

Reference

- If different values are used for the encryption passphrase for the machine and the printer driver, the machine cannot decrypt the encrypted user password, account password or secure document password, and printing cannot be performed.
- The common encryption key is automatically generated by the [Encryption Passphrase]. The common encryption key cannot be specified directly.

11.8.1 Settings for the machine

Go to Administrator Settings to configure the settings for the machine.

- 1 In the [Administrator Settings] screen, press [Security Settings].
- 2 In the [Security Settings] screen, press [Driver Password Encryption Setting].
- **3** Press [User-Defined].
 - → If you do not specify a user-defined [Encryption Passphrase], press [Use Factory Default].

4 Press [Encryption Passphrase].

5 Press [Encryption Passphrase], and then enter the encryption passphrase.

	Use the keyboard or keypad to enter the new encryption passphrase you must enter the encryption passphrase buice to confirm. Press (C) to erase the encryption passphrase.
Administrator Sett. Settings > Encrypt.	inge > Driver Password Encryption ion Passphrase

7 Press [OK].

This sets the encryption passphrase.

11.8.2 Setting the printer driver

The following four printer drivers support this feature.

- PCL Printer Driver for Windows (PCL driver)
- PostScript Printer Driver for Windows (PS driver)
- XPS Printer Driver for Windows (XPS driver)
- PostScript PPD Printer Driver for Mac OS X

For Windows

- 1 Display the Properties window.
 - → The Properties window can be displayed by opening the [Printers] or [Printers and Faxes] window and right-clicking the icon of the installed printer, and then clicking [Properties].
- 2 Click the [Configure] tab.
- 3 Select the [Encrypt. Passphrase] check box, and then enter the encryption passphrase.
 - → If you do not specify a user-defined [Encrypt. Passphrase], clear the [Encrypt. Passphrase] check box.

- → Enter the [Encryption Passphrase:] with 20 alphanumeric letters. Specify the same [Encryption Passphrase:] for the machine and the printer driver.
- \rightarrow An encryption passphrase using a series of the same letters is invalid.
- 5 Click [OK].

The printer driver has a function to specify the ICC profile registered on the machine when printing.

Reference

- The default setting for the ICC profile registered on the machine can be specified in [ICC Profile Settings]. For details, refer to page 12-27.
- To utilize the ICC profiles added to the machine, the ICC profiles on the machine must be registered in the printer driver in advance. For details, refer to page 11-39.

11.9.1 Setting the printer driver

The following two printer drivers support this feature.

- PostScript Printer Driver for Windows (PS driver)
- PostScript PPD Printer Driver for Mac OS X

For Windows

- 1 Click to display the [Quality] tab.
- 2 Click [Quality Adjustment...].

The [Quality] dialog box appears.

- 3 Click to display the [ICC Profile] tab.
- 4 Click [Detail] and select a document type.

When printing, color processing is performed according to the selected ICC profiles.

4 Click [OK].

11.10 Registering the ICC profiles in the printer driver

Additional ICC profiles downloaded and added to the machine can be registered in the printer driver.

A registered ICC profile can be specified when printing.

Reference

• The ICC profiles are registered to the machine using the "Download Manager" application. For details, refer to the Help for the application software.

11.10.1 Setting the printer driver

The following two printer drivers support this feature.

- PostScript Printer Driver for Windows (PS driver)
- PostScript PPD Printer Driver for Mac OS X

For Windows

- ✓ The [Color Profile Management] function communicates with the machine to read the ICC profiles available to the machine. This function is available only when your computer is connected to and can communicate with this machine.
- ✓ If connected via a USB connector, the ICC profiles available to the machine cannot be read.
- 1 Click to display the [Quality] tab.
- 2 Click [Quality Adjustment...].

The [Quality Adjustment] dialog box appears.

3 Click [Manage Profile].

 - → To register the current driver settings as the profile, click [New], and then enter the [File Name] and [Profile Name].
 - → The profile name can be changed in [New/Edit].

The selected profile is added to [Driver Profile List] and it can be selected in the ICC Profile entries in the [Quality Adjustment] dialog box.

7 Click [OK].

11.11 Banner printing function

On this machine, paper size up to 47-1/4 inches (1200 mm) in length can be loaded into the bypass tray for printing, by configuring on the control panel.

In the following sections, loading long paper and printing on it are referred to as banner printing.

11.11.1 Paper

Applicable paper

Paper width	Paper length	Paper weight
8-1/4 to 11-11/16 inches (210 to 297 mm)	18 to 47-1/4 inches (457.3 to 1200 mm)	33-13/16 to 55-7/8 lb (127 g/m ² to 210 g/m ²) (Using the printer driver, select the paper type appropriate for the weight of the banner paper to be used. 33-13/16 lb to 41-3/4 lb (127 g/m ² to 157 g/m ²): Thick 1, Thick 1 (Side 2) 42 lb to 55-5/8 lb (158 g/m ² to 209 g/m ²): Thick 2, Thick 2 (Side 2) 55-7/8 lb (210 g/m ²): Thick 3, Thick 3 (Side 2))

11.11.2 Printer drivers and supported operating systems

The following drivers support banner printing.

- PCL Driver for Windows (PCL driver)
- PostScript Driver for Windows (PS driver)
- XPS Printer Driver for Windows (XPS driver)

11.11.3 Configuring the printer driver

Specify the output paper size as a custom paper size.

- 1 Click the [Basic] tab.
 - → With the PCL Driver, custom size setting can also be registered in advance on the [Settings] tab of the printer driver accessed from the Windows' [Printers] ([Printers and Faxes] for Windows XP/Server 2003) window.
- 2 Select [Custom Size] from [Original Size] or [Paper Size].

The [Custom Size Settings] dialog box appears.

- Select the width and the length of the custom size according to the unit you use and then click [OK].
 The [Confirm setting changes] dialog box appears.
- 4 Click [Yes].
- 5 If necessary, configure [Paper Settings for Each Tray...], [Bypass Tray], [Paper Type], and other settings.
- 6 Click [OK].

11.11.4 Printing

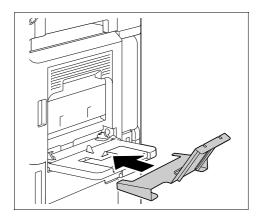

- **1** Press the **Utility/Counter** key on the control panel.
- 2 Press [Banner Printing].
- 3 Press [Allow], and then the [OK].

12.2.7 Binding Direction Adjustment

Specify the method for paper arrangement (adjusting the binding position) for 2-sided printing. (Default: [Finishing Priority])

To increase the print efficiency, specify [Productivity Priority]. If the desired binding position and width cannot be achieved, specify [Finishing Priority].

- [Finishing Priority]: All pages can be processed to an optimum condition because the machine adjusts the binding positions after receiving the print data.
- [Productivity Priority]: Printing is performed efficiently because the printer processes data while receiving or printing concurrently.
- [Control Adjustments]: The printer follows the settings configured in the printer driver without adjusting the binding position.
- 1 In the User Settings screen, press [Printer Settings].
 - → For details on displaying the User Settings screen, refer to page 12-3.
- 2 Press [Basic Settings].
- 3 Switch the page by pressing [\uparrow] or [\downarrow], and then press [Binding Direction Adjustment].

12.2.24 Auto Trapping

Select this option to superimpose neighboring colors to print so as to prevent white space being generated around a picture. (Default: [OFF])

- [ON]: Adjacent colors are overprinted. If white lines appear at borders of colors on a graph or figure, select [ON].
- [OFF]: The data is printed as is without being trap-processed.

Reference

- If color-dulling results at the border of colors when [ON] is selected, change it to [OFF].
- Trapping process is sometimes specifiable with the application. When the trapping process is specified in the application, specify [OFF] on the machine side.
- 1 In the User Settings screen, press [Printer Settings].
 - \rightarrow For details on displaying the User Settings screen, refer to page 12-3.

12.2.25 Black Overprint

Select this option to print with no white space around black characters or figures. (Default: [OFF])

- [Text/Figure]: Adjacent portion between a text and figure is overprinted with black. Use this setting when a white line appears around the black portion in a graph or figure.
- [Text]: Black is overprinted on the adjacent colors in the text portion. Use this setting when a white line
 appears around the text.
- [OFF]: The data is printed as is without overprinting with black.

Reference

- If color-dulling results around the black portion when [ON] is selected, change it to [OFF].
- The black overprinting process is sometimes specifiable with the application. When the trapping process is specified in the application, specify [OFF] on the machine side.
- 1 In the User Settings screen, press [Printer Settings].
 - → For details on displaying the User Settings screen, refer to page 12-3.

12.2.31 Print

Specify print conditions to print a document from a cellular phone or PDA. (Default: [1-Sided], [Full Color], [Finishing]-None)

- Basic Print: Select 1-Sided or 2-Sided.
- Basic Full Color: Select Full Color or Black.
- Basic Paper: Select the printing paper size if the sent data does not contain paper size information.
- Basic Finishing: Specify Fold/Bind, Staple, or Punch.
- Application Margin: Select the margin position.
- Application Stamp/Composition: Composes the following contents when printing.

Item Description		
[Date/Time]	The date and time of printing are printed on the pages.	
[Page Number]	A page number is printed on all pages of a document.	
[Stamp]	A preset character string such as "URGENT" is printed on pages.	
[Copy Security]	A pattern to prevent unauthorized copying is printed on pages. [Copy Protect]: Prints hidden text. [Copy Guard]: Prints a Copy Guard pattern. [Password Copy]: Prints a password for Password Copy.	
[Stamp Repeat]	Text or an image is repeatedly printed on all pages.	

Reference

- Cellular Phone/PDA Setting is displayed when the optional Local Interface Kit EK-605 is installed while [Bluetooth Setting] is enabled in this machine and [Cellular Phone/PDA Setting] is enabled in Administrator Settings For details, refer to page 12-57.
- [Copy Guard] or [Password Copy] is displayed when the optional **Security Kit SC-507** is installed. For details, refer to the [User's Guide Copy Operations].

4 In the Administrative Settings screen, press [ID & Print Operation Settings].

5 Press the desired button.

12.4.10 Print without Authentication

Specify whether to allow the print jobs without authentication specified when the machine is performing user authentication or account track. (Default: [Restrict])

- [Allow]: Select this option to allow the print jobs to be printed when an ID and password for user authentication or an account name and password for account track are not specified. Printing is counted as a public job.
- [Restrict]: Select this option not to allow the print jobs to be printed when an ID and password for user authentication or an account name and password for account track are not specified.

Reference

- If the print jobs without authentication specified are permitted to be printed, printing can be performed on this machine performing user authentication or account track, even if user authentication or account track is not specified in the printer driver. Select Restrict if you want to control usage for the counter management or security reasons.
- A print job without authentication specified means a job that performed printing without enabling User Authentication or Account Track in the printer driver. In Windows, it means a job for which User Authentication or Account Track is set to [Disable] in [Configure] tab - [Device Option] in the Properties window. In Macintosh OS X, it means a job for which the User Authentication or Account Track check box is not selected in the [Output Method] window.
- 1 In the Administrator Settings screen, press [User Authentication/Account Track].
 - → For details on displaying the Administrator Settings screen, refer to page 12-40.
- 2 In the User Authentication/Account Track screen, press [Print without Authentication].
- **3** Press the desired button.

	Touch [Allow] to allow printing without authentication.

4 Press [OK].

The print without authentication is specified.

12.4.11 Single Color > 2 Color Output Management

Configure whether to manage the output of a single color or 2 colors as color print or black print. When managing it as black print, even a user who is restricted from performing color printing can create a single color or 2 color output. (Default: [Color])

- [Color]: Select this option to count the printing done in a single color or 2 colors as color printing.
- [Black]: Select this option to count the printing done in a single color or 2 color as black printing.
- 1 In the Administrator Settings screen, press [User Authentication/Account Track].
 - → For details on displaying the Administrator Settings screen, refer to page 12-40.
- 2 In the User Authentication/Account Track screen, press [User/Account Common Setting].
- 3 In the User/Account Common Setting screen, press [Single Color > 2 Color Output Management].
- 4 Press the desired button.

12.4.16 Configuring the cellular phone or PDA settings

You can specify whether to allow printing from a cellular phone or PDA and saving in a User Box. (Default: [Restrict])

- [Allow]: Allow printing from a cellular phone or PDA, and saving in a User Box.
- [Restrict]: Not allow printing from a cellular phone or PDA, or saving in a User Box.

Reference

- Cellular Phone/PDA Setting is displayed when the optional **Local Interface Kit EK-605** is installed while [Bluetooth Setting] is enabled in this machine. For details, refer to the [User's Guide Network Administrator]. To enable a Bluetooth communication, contact your service representative in advance.
- 1 In the Administrator Settings screen, press [System Connection].
 - → For details on displaying the Administrator Settings screen, refer to page 12-40.
- 2 In the System Connection screen, press [Cellular Phone/PDA Setting].
- **3** Press the desired button.

Whether to allow or prohibit data capturing of a print job is specified.

→ For details, contact your technical representative.

12.4.18 Secure Print Only

Specify whether the printing from the computer should be limited only to the security document. (Default: [No])

Whenever printing is done from the printer driver, the data must be transmitted using the secure printing. Because this setting requires ID/password for every print job, your job is protected from intercepting by a third party.

- [Yes]: Select this option to limit the printing only to the secure documents.
- [No]: Select this option not to limit the printing to the secure documents.

Reference

- When you print a document on the machine with [Secure Print Only] set to [Yes], specify [Secure Print Only] on the printer driver so that only the [Secure Print] jobs are transmitted.
- If a normal print job is sent to the machine where [Secure Print Only] is set to [Yes], the print job is deleted.

Reference

For details on secure printing, refer to page 11-6.

- 1 In the Administrator Settings screen, press [Security Settings].
 - → For details on displaying the Administrator Settings screen, refer to page 12-40.
- 2 In the Security Settings screen, press [Security Details].
- 3 Switch the page by pressing [\uparrow] or [\downarrow], and then press [Secure Print Only].
- 4 Press the desired button.

Whether the printing should be limited to security documents is specified.

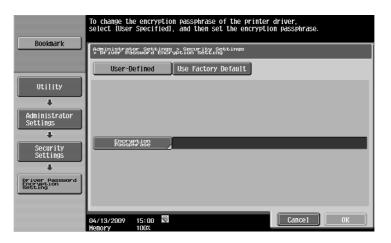

12.4.19 Driver Password Encryption Setting

For the common encryption key to be added to print jobs, specify whether to use the factory default setting or to change to a user-defined encryption passphrase. (Default: [Use Factory Default])

- [User-Defined]: Specify an encryption passphrase. Enter an encryption passphrase of 20 characters.
- [Use Factory Default]: Select this option to use the encryption passphrase <a preset encryption key (common key) that is not exposed> preset at shipping.

Reference

- An encryption passphrase must be specified using 20 characters.
- User, account, and secure document passwords are encrypted by the common encryption key.
- When [User-Defined] is selected for the encryption passphrase, select the check box for the encryption passphrase in the printer driver to enable it, and then enter the same value. If different values are used for the encryption passphrase for the machine and the printer driver, the machine cannot decrypt the encrypted user password, account password or secure document password, and printing cannot be performed. For details, refer to page 11-33.
- When OpenAPI is used and SSL is enabled, it is possible for the machine to obtain the common encryption key provided that the device information of the printer driver can be obtained automatically.
- 1 In the Administrator Settings screen, press [Security Settings].
 - → For details on displaying the Administrator Settings screen, refer to page 12-40.
- 2 In the Security Settings screen, press [Driver Password Encryption Setting].
- **3** Press the desired button.

Reference

For details on selecting [User-Defined] for the encryption passphrase, refer to page 11-33.

13 Web Connection

13.1 Using Web Connection

Web Connection is a device control utility provided by the HTTP server built in the printer controller. Using a Web browser on a computer connected to the network, you can change machine settings and check the status of the machine. Using this utility, you can configure some settings, which are to be handled in the control panel of this machine, through your computer, and also smoothly enter characters.

13.1.1 Operating environment

Operating environment

Network	Ethernet (TCP/IP)
Applications on compu- ter	 Web browser: <for 2000="" 2003="" nt4.0="" server="" vista="" windows="" xp=""></for> Microsoft Internet Explorer Ver. 6/7 (JavaScript and Cookies enabled) Netscape Navigator 7.02 or later (JavaScript and Cookies enabled) Mozilla Firefox 1.0 or later (JavaScript and Cookies enabled) <for 9.x="" macintosh="" macos="" x=""></for> Netscape Navigator 7.02 or later (JavaScript and Cookies enabled) Mozilla Firefox 1.0 or later (JavaScript and Cookies enabled) <for linux=""></for> Netscape Navigator 7.02 or later (JavaScript and Cookies enabled) <for linux=""></for> Netscape Navigator 7.02 or later (JavaScript and Cookies enabled) Mozilla Firefox 1.0 or later (JavaScript and Cookies enabled) Adobe[®] Flash[®] Player: Plug-in Ver.7.0 or later required to select Flash as the display format. Plug-in Ver.9.0 or later required to use the Data Management Utility (font/macro data management).

13.1.2 Accessing Web Connection

- ✓ Start the Web browser to access Web Connection.
- ✓ If User Authentication is enabled, enter the user name and password. For details, refer to page 13-10.
- ✓ For details on setting the IP address of this machine, refer to [User's Guide Network Administrator].
- ✓ Web Connection has two view modes: Flash and HTML. For details, refer to page 13-8.
- 1 Start the Web browser.
- 2 Enter the IP address of the machine in the URL field, and then press [Enter].

http://<IP address of the machine>/

Example: When the IP address of this machine is 192.168.1.20:

http://192.168.1.20/

When IPv6 is set to [ON] while a browser other than Internet Explorer is used:

- Enter the IPv6 address enclosed in brackets [] to access Web Connection.
- http://[IPv6 address of this machine]/

Example: When the IPv6 address of this machine is fe80::220:6bff:fe10:2f16:

- http://[fe80::220:6bff:fe10:2f16]/
- If IPv6 is set to [ON] while Internet Explorer is used, add "fe80::220:6bff:fe10:2f16IPv6 IPv6_MFP_1" to the hosts file in advance, and specify the address with the domain name.

The main menu or login page appears.

13.1.3 Web browser cache

The Web browser has the cache function; therefore, the latest information may not be shown in the page displayed using **Web Connection**. Using the cache function may result in an operation failure. When using **Web Connection**, disable the cache function on the Web browser.

Reference

- Some Web browser versions may provide different menus and item names. For details, refer to the Help for the Web browser.
- With the cache function enabled, timeout occurs in the administrator mode, and after that, how many time you try to access, just timeout recurs. It results in the control panel of this machine being locked, and you cannot handle the control panel. In this case, turn the main power off, and then turn it on again. To avoid this problem, disable the cache function.

For Internet Explorer

- **1** Select [Internet Options] in the [Tools] menu.
- 2 In the [General] tab, select [Temporary Internet files] [Settings].
- 3 Select [Every visit to the page], and click [OK].

For Netscape Navigator

- 1 Select [Preferences] in the [Edit] menu.
- 2 In [Category] on the left, select [Advanced] [Cache].
- 3 In [Document in cache is compared to document on network], select [Every time].

For Mozilla Firefox

- 1 Select [Options] in the [Tools] menu.
- 2 Select [Privacy], and then click [Settings] in the Private Data section.
- 3 Select the [Cache] check box under [Private Data] select the [Clear private data when closing Firefox] check box under [Settings], and then click [OK].

13.2 Login and Logout

13.2.1 Login and logout flows

Accessing with **Web Connection** displays the login page when User Authentication or Account Track is enabled, and displays the login page in the public user mode when User Authentication or Account Track is not enabled. When re-logging in to this machine as a different user or as an administrator, log out once, and log in again.

13.2.3 Login

Web Connection provides the user or administrator mode depending on how to log in. If necessary, you can log in to the user mode as an administrator or User Box administrator depending on user authentication or User Box administrator setting.

Reference

- You can log in as a User Box administrator when the User Box administrator is enabled using the control panel. For details on the User Box administrator settings, permissions and password settings, refer to the [User's Guide Box Operations].
- When logged in to the user mode as an administrator, jobs that could not be deleted in the administrator mode can be deleted.
- In the login page, select the desired Data Management Utility. For details on Data Management Utility, refer to the [User's Guide Network Administrator].

Login options

You can select items as required when logging in.

Item	Description
[Language]	Select the display language.
[View Mode]	 Select Flash or HTML. If the screen reader software is used, we recommend selecting [HTML] as the view mode. In an IPv6 environment, select [HTML]. Flash Player is required when selecting [Flash].

13.3 Structure of pages

Clicking an item in the top menu after logging in to **Web Connection** shows the linked information in the following configuration. The following shows an example of the page displayed when Device Information is selected in the Information tab.

Reference

 The contents of the Web Connection pages vary depending on the options installed in this machine or the settings of this machine.

No.	Item	Description
1	Login user name	Displays the current login mode icon and user name (public, admin- istrator, User Box administrator, registered user, or account). Click the user name to display the login user name.
2	Status display	Displays the status of the printer and scanner sections of this ma- chine with icons and messages. Clicking the desired icon when an error occurs displays the information (Consumable Info, Paper Tray, or user registration page) associated with the icon to enable you to check the status.
3	Message display	Displays the operating status of this machine.
4	[To Login Screen]/ [Log- out]	Click this button to log out the current mode and log in again. When logged in as a public user, [To Login Screen] appears. When logged in as a registered user or an administrator, [Logout] appears.
5	[Change Password]	Click this button to jump to the user password change page. This button appears only in the user mode page in which you logged in as a registered user.

No.	Item	Description
6	Help	Click this icon to display the page specified in the Online Help Web- site. For the specified pages, refer to [Online Assistance] in page 13-21.
7	Refresh	Click this icon to refresh the information displayed in the page.

Item	Description
[Meter Count]	Enables you to check the meter count of this machine.
[ROM Version]	Enables you to check the ROM version.
[Import/Export]	Saves (exports) setting information of this machine as a file, or writes (imports) it from a file to this machine.
[Status Notifica- tion Setting]	Configure the function to be reported to a registered user when an error has oc- curred in this machine. Specify the destination and items to notify a registered user of an error.
[Total Counter Notification Set- ting]	Configure the setting to notify the target user of the total counter by E-mail, and reg- ister the E-mail address of the destination.
[Date/Time Set- ting]	Specify the date and time displayed in this machine.
[Timer Setting]	Configure Power Save or Weekly Timer Setting in this machine.
[Network Error Code Display Setting]	Specify whether to display the network error code.

Item	Description
[Reset]	Clears all settings for the network, controller and destinations.
[License Settings]	Allows you to issue a license and enable functions. Also, a request code can be issued.
[Edit Font/Macro]	Adds font or macro.
[Job Log]	Allows you to create and download log data of the jobs that were executed in this machine.

13.5.2 System Settings

Reference

• To use this machine as a scanner with the application software under TWAIN, install the dedicated driver software "TWAIN". For details, refer to the TWAIN driver manual in the DVD supplied together with this machine.

Item	Description
[Address Book]	Enables you to check the address book registered in this machine or to register and change an address.
[Group]	Enables you to check the group address book registered in this machine or to reg- ister and change an address.
[Program]	Enables you to check the program address book registered in this machine or to register and change an address.
[Temporary One- Touch]	Enables you to check the temporary program address book registered in this ma- chine or to register and change an address.
[Subject]	Registers up to 10 subjects when sending E-mails.
[Text]	Registers up to 10 body messages to be used when sending E-mails.
[Application Reg- istration]	 Registers application settings and server addresses when using the applications such as RightFax Server registered in the external server. Registering applications and servers enables you to automatically connect to the server of the selected application. [Application Registration] is not displayed when the optional Fax Kit is installed.
[Prefix/Suffix]	Registers Prefix or Suffix to be added as destination information when E-mailing.

Item	Description
[Header/Footer Position]	Configure the setting to print the sender or receiving information.
[Line Parameter Setting]	Specify the fax line such as Dialing Method.
[TX/RX Settings]	Configure the paper, User Box, and other settings for sending or receiving data.
[Function Setting]	Configure the fax settings for Memory RX or Network Fax.
[PBX Connection Setting]	Specify the outside line at PBX connection.
[Report Settings]	Configure the setting for a report, for example, Activity Report, to be output when sending or receiving data.
[Multi Line Set- tings]	Specify the parameters and functions of the extended line.This item is displayed when a line is extended.
[Network Fax Set- ting]	Configure the setting to use network fax.
[Header Informa- tion]	Registers sender information and fax number when sending data.

13.5.10 Setting for each purpose

Configure the settings according to the instructions shown in the window for items requiring multiple settings.

The available setting items are as follows.

- Configure the settings for sending a scanned document
- Configure the network print settings
- Restrict users using this machine

	Administrator Logout ?
	Ready to Scan
	🕅 In Menu (Admin Mode)
Wizard 🗸 Di	splay 📃 🛄 To Main Menu
Wizard	Wizard The setup required for the selected workflow can be accomplished through the wizard.
	Wizard
Setup is completed.	The setup is performed according to the procedure outlined in the operation objective. Please select a setting.
	TX Setting for scan documents.
	C Network print settings.
	C Restrict users from using this device.
	Next

- As the setting procedure proceeds, its progress flow is displayed on the left.
- If setting is cancelled, you will return to the Setting for each purpose screen after the items that were configured before cancellation have been applied.

14 Troubleshooting

14 Troubleshooting

14.1 Cannot print

This section describes how to solve issues and problems that you may encounter while using the printer.

If you cannot print even when you have completed the printing procedure, check the following items in order from beginning to end.

Problem	Possible Cause	Remedy
A message saying "Printer is not connected" or "Print Error" ap- pears on the computer screen.	The printer driver specified when printing may not be sup- ported by the printer controller.	Check the specified printer name.
	The network or USB cable may be disconnected.	Check that the cable is correctly connected.
	An error may have occurred on this machine.	Check the control panel of this machine.
	Memory may be insufficient.	Perform a test printing to check whether printing is possible.
A postscript error appears on the computer screen.	Memory of the computer may be insufficient.	Perform a test printing to check whether printing is possible.
	There may be an error in the application software settings.	Refer to the user's manual of the application software to check the settings.
	The file printing settings may be incorrect.	Change the settings and try to print again.
Print processing on the compu- ter finished, but printing does not start.	The printer driver specified when printing may not be sup- ported by the printer controller.	Check the specified printer name.
	The network or USB cable may be disconnected.	Check that the cable is correctly connected.
	An error may have occurred on this machine.	Check the control panel of this machine.
	Unprocessed jobs may remain on this machine and be waiting to be processed.	Check the processing order for the job using Job List on the con- trol panel of this machine. When [Skip Job Operation Set- tings] is enabled in the [Adminis- trator Settings] of this machine, only the jobs without a problem are processed.
	When executing the print job, [Save in User Box] may have been specified.	Check from the control panel of the machine whether the intend- ed print job is held in a User Box.
	When executing the print job, [Secure Print Only] may have been specified.	Check from the control panel of the machine whether the intend- ed print job is held in the [Secure Print User Box].
	[Secure Print Only] may be specified on the machine.	Use [Secure Print] when execut- ing the print job.
	When the account track is ena- bled, you may have entered an unregistered account track code or password.	Enter the correct account track code and password.

Problem	Possible Cause	Remedy
	When the user authentication is enabled, you may have entered an unregistered user name or password.	Enter the correct user name or password.
	Different encryption passphras- es may be specified for the printer driver and the machine.	Specify the same encryption passphrase for the machine and the printer driver.
	Memory of the computer may be insufficient.	Perform a test printing to check whether printing is possible.
	Network connection with the printer controller is not estab- lished (when connecting via the network).	Contact your network administrator.
	This machine may be in the en- hanced security mode.	Configure authentication setting in the enhanced security mode. For details, contact the printer ac ministrator.
Printing order is disturbed - a job sent later is printed before the preceding jobs.	An error may have occurred on the printer for a reason such as running out of paper.	When [Skip Job Operation Set- tings] is enabled in the [Adminis trator Settings] of the printer, onl the jobs without a problem are processed and those with any problem are held in queue.
Secure print is not available.	The password rules may be en- abled on the machine.	Specify a password according to the password rules.
	Different encryption passphras- es may be specified for the printer driver and the machine.	Specify the same encryption passphrase for the machine and the printer driver.
Jobs saved in a User Box have disappeared.	Jobs saved in a User Box may be deleted due to the settings on the machine.	Check the User Box settings for the machine. For details, refer to the [User's Guide Box Opera- tions].
Printing in the user authentica- tion or account track mode is	The user name, account name or password is incorrect.	Enter the correct user name, account name and password.
not available.	User authentication or account track may be disabled on the printer driver.	Enable user authentication or ac count track on the printer driver.
	Different encryption passphras- es may be specified for the printer driver and the machine.	Specify the same encryption passphrase for the machine and the printer driver.
	The entered user name or ac- count name may not be author- ized.	Check with the administrator whether the user name or ac- count name concerned is author ized for printing.
Printing is not available when you have selected [Public User] in user authentication.	Printing by public users may be prohibited on the machine.	Check with the administrator whether printing by public users is permitted.

When the above troubleshooting does not eliminate the problem, refer to the [User's Guide Copy Operations].

14.2 Cannot configure the settings/Cannot print according to the settings

Check the following items when you cannot configure settings of the printer driver or cannot print according to the settings you have configured.

Reference

• Some items for the printer driver may not be configured simultaneously.

14.2.1 The printer driver settings have no effect

Problem	Possible Cause	Remedy
Cannot select items in the print- er driver.	Some functions cannot be com- bined.	Grayed out items cannot be con- figured.
A "conflict" message saying "unable to configure" or "func- tion will be canceled" appears.	You are trying to configure the functions that cannot be combined.	Check carefully the functions you have specified, and then specify the functions that can be combined.
Cannot print according to the settings you have configured.	The settings may not be config- ured correctly.	Check the setting of each item of the printer driver.
	The selected functions can be combined in the printer driver, but may not be combined in this machine.	
	The paper size or paper orienta- tion specified in the application may take precedence over the settings in the printer driver when printing.	Configure settings in the applica- tion correctly.
The watermark cannot be print- ed.	The watermark settings may not be configured correctly.	Check the watermark settings.
	The density of the watermark may be too light.	Check the density setting.
	Some graphic applications do not print watermarks.	When using such a program, the watermark cannot be printed.
The staple function cannot be specified.	The staple function cannot be used if the Paper Type is set to Thick or Transparency.	Check the setting of each item of the printer driver.
	The staple function requires the optional Finisher FS-527 or Finisher FS-529 .	Install the required options and enable them on the printer driver.
Cannot staple.	When printing a large number of pages, stapling cannot be per- formed.	Change the number of pages to be printed.
	If the document contains pages of different sizes, stapling can- not be performed.	Check the document.
The stapling position is not as expected.	The orientation setting is not correct.	Check the stapling position in the printer driver settings.
Cannot specify the punch func- tion.	The hole punching cannot be specified when Booklet, Transparency, Thick 2, Thick 3, or Envelope is selected as the paper type.	Check the setting of each item of the printer driver.
	The optional Finisher FS-527 and Punch Kit are required.	Install the required options and enable them on the printer driver.

Problem	Possible Cause	Remedy
Cannot punch.	Printed pages may be fed out without being punched if the pa- per is loaded into the paper source with an incorrect orienta- tion.	Check the orientation setting.
The punch position is not as expected.	The orientation setting is not correct.	Check the punching position in the printer driver settings.
Combination fails; pages are not combined, but are printed separately.	Originals having different orien- tations are combined.	Align the orientations of the original.
The overlay is not printed properly.	Memory of the computer may be insufficient.	Simplify the overlay to reduce the data size.
	Overlay data was created in color.	For color overlay data, the overlay is printed in color even if Gray Scale is selected with the PCL driver.
Images are not printed properly.	Memory of the computer may be insufficient.	Simplify the images to reduce the data size.
Paper is not fed from the speci- fied paper source.	Paper will not be fed from the specified paper source if that paper source is loaded with pa- per of a different size or orienta- tion.	Load the paper of the appropriate size and orientation into the de- sired paper source.
The user authentication or ac- count track setting field is grayed out and cannot be spec- ified.	User authentication or account track may be disabled on the Windows printer driver.	In the [Configure] tab, enable user authentication or account track.

14.2.2 Others

Problem	Possible Cause	Remedy
Cannot install the printer driver.	It has already been installed in Windows Vista/Server 2008 as a printer compatible with the Web service print function.	If you try to install a printer driver in Windows Vista/Server 2008 by use of the Web service print func- tion, it is recognized as installed before the actual installation is completed. Uninstall the printer in the [Network] Window, and then install it again.

14.2.3 Error message

Message	Cause and remedy
Cannot connect to the network	A connection to the network was not able to be established. Make sure that the network cable is correctly connected. In addition, make sure that [Network Settings] in [Administrator Settings] have been cor- rectly configured.

15.2.3 PS font list

15.2.4 GDI demo page

15.3 PPD driver (For Linux and applications)

15.3.1 PPD driver types

The PPD driver contains the PPD information for Mac OS 9, Linux, and applications.

- Driver for Linux: Install for use with Linux (Contains PPD for Linux and PPD for OpenOffice)
- Driver for applications: Install when using applications such as Adobe PageMaker that require the PPD driver.

15.3.2 PPD driver for Linux

Operating environment

The PPD driver operates in the environment where systems are combined as follows.

- OS:Red Hat Enterprise Linux 4 -CupsVersion:1.1
- OS:SuSE Linux 10.1 -CupsVersion:1.2
- OpenOffice v1.1.5

Registering the PPD driver for Linux

- 1 Copy the PPD file to the CUPS model directory. (/usr/share/cups/model for major Linux)
- 2 In [Add Printer] of the CUPS printing system, specify PPD to add this machine.
 - → For details on CUPS, refer to [Help] in the CUPS Web management page.

Configuring the PPD driver for Linux

In [Configure Printer] of the CUPS printing system, configure the functions.

Registering the PPD driver for OpenOffice

- 1 In [Add Printer] of the CUPS printing system, specify PPD to add this machine.
- 2 Open the OpenOfficePrinterAdministrator tool.
- 3 Click [New Printer].
- 4 In the [Choose a device type] window, select [add a printer], and then click [Next].
- 5 In the [Choose a driver] window, click [import].
- 6 Select [36C-1 OpenOffice PPD], and then click [OK].
- 7 From the [Please Select a Suitable driver.] list, select [36C-1 OpenOffice PPD], and then click [Next].
- 8 In the [Choose a command line] window, select the printer registered to CUPS, and then click [Next].
- 9 Click [Finish].

Printing with OpenOffice

- 1 In OpenOffice, select File-Print.
- 2 Select [36C-1 OpenOffice PPD] in [Printer name].
- 3 Click [Properties].
- Select the desired setting in [Page size], and then click [OK].To configure settings other than Page Size, click [Configure Printer] in CUPS.
- 5 Click [OK] in the OpenOffice print window to print.

15.3.3 PPD driver for applications

PPD registration destination (Example: Adobe PageMaker)

- For PageMaker 6.0:
- Copy the PPD file to RSRCPPD4 under the folder to which PageMaker is installed.
- For PageMaker 6.5 and 7.0: Copy the PPD file to RSRC<Language>PPD4 under the folder to which PageMaker is installed.

How to print

- 1 Select [File] [Print].
- 2 From the [PPD] box in the print window, select this machine.
- 3 Configure the [Paper] and [Features] settings for the printer.
- 4 Click the [Print] button to print.

15.4 Glossary

Term	Description	
10Base-T/ 100Base-TX/ 1000Base-T	A set of specifications under the Ethernet standards. Those cables that consist of twisted copper wire pairs are used. The transmission rates of 10Base-T, 100Base-TX and 1000Base-T are respectively 10Mbps, 100Mpbs and 1000Mbps.	
Adobe [®] Flash [®]	Software or its file format developed by Adobe Systems Inc. (formerly by Macro- media, Inc.), used to create a content by compiling vector-graphic animations and sounds. The software allows handling interactive contents using keyboard or mouse. The files can be kept relatively compact and accessed from a Web browser with ded- icated plug-in software.	
AppleTalk	The generic name for the protocol suite developed by Apple Computer for computer networking.	
bit	The abbreviation for binary digit. The smallest unit of information (data quanti handled by a computer or printer. A bit uses only a 0 or a 1 to indicate data.	
BMP	The abbreviation for bitmap. This is a file format for saving image data. (The file extension is ".bmp".) Commonly used on Windows platforms. BMP covers the color depth from mon- ochrome (2 values) to full color (16,777,216 colors). BMP images are not suitable for compressed storage.	
Bonjour	A Macintosh network technology, automatically detecting a device connected to the network for automatic configuration. Previously called "Rendezvous", and has been changed to "Bonjour" since Mac OS X v10.4.	
BOOTP	The abbreviation for Bootstrap Protocol. The protocol is used for a client compu- ter on the TCP/IP network to load network configuration automatically from a server. Instead of BOOTP, DHCP, an advanced protocol based on BOOTP, is typically used today.	
Byte	A byte indicates a unit of information (data quantity) handled by a computer or printer. A byte consists of eight bits.	
СМҮК	The acronym for Cyan, Magenta, Yellow, and Black. The colors in the toner or ink used for color printing. Changing the mixing ratio of the four CMYK colors allows creating any type of full colors.	
Default Gateway	A device, such as a computer or router, used as a "gateway" to access computers on different LANs.	
DHCP	The acronym for Dynamic Host Configuration Protocol. The protocol is used for a client computer on the TCP/IP network to load network configuration automat- ically from a server. Just using a DHCP server to centrally manage IP addresses of the DHCP clients enables you to construct a network without IP address con- flicts or other troubles.	
DNS	The acronym for Domain Name System. DNS allows for obtaining the IP address corresponding to a host name in network environments. This system enables a user to access other computers on the network by specifying host names instead of elusive and non-intuitive IP addresses.	
DPI (dpi)	The acronym for Dots Per Inch. A unit of resolution used for printers and scan- ners. This indicates the number of dots used to represent an inch. The higher this value, the higher the resolution.	
FTP The acronym for File Transfer Protocol. This is a protocol used for transfiles via the Internet, an intranet or other TCP/IP network.		
HTTP	The acronym for HyperText Transfer Protocol. This is a protocol used to send or receive data between a Web server and a client (such as a Web browser). HTTP can exchange files such as images, sounds, and movies that are associated with documents, including their presentation formats and other information.	
IPP	The acronym for Internet Printing Protocol. This is a protocol used to send or re- ceive print data or control printers via the Internet or other TCP/IP network. IPP can also send and print data to printers in remote areas via the Internet.	
IPX	One of the protocols used for NetWare. IPX runs in the network layer of the OSI reference model.	

Term	Description	
IPX/SPX	The abbreviation for Internetwork Packet Exchange/Sequenced Packet Exchange. This is a protocol developed by Novell, Inc., typically used in NetWare environments.	
IP Address	An address or a code used to identify an individual network device on the Inter- net. IPv4 (Internet Protocol version 4), a protocol widely used today, adopts a 32- bit number for an IP address separated into four sections. An example of an IPv4 IP address is: 192.168.1.10. On the other hand, IPv6 (Internet Protocol version 6), the next generation protocol, adopts 128-bit IP addresses. An IP address is as- signed to every computer or other device connected to the Internet.	
LAN	The acronym for Local Area Network. This is a network constructed by connect- ing computers on the same floor, in the same building, or in neighboring build- ings.	
LPD	The acronym for Line Printer Daemon. This is a platform-independent printer pro- tocol running on the TCP/IP network. The protocol was originally developed for BSD UNIX, and has become one of the printing protocols typically used among general computers.	
LPR/LPD	The acronym for Line Printer Request/Line Printer Daemon. This is a printing method implemented via networks, used for Windows NT or UNIX based systems. It uses TCP/IP to output printing data from Windows or UNIX to a printer on the network.	
MAC address	MAC is the acronym for Media Access Control. A MAC address is an ID number unique to each Ethernet card, enabling sending or receiving data to or from other Ethernet cards. A Mac address is a 48-bit number. The first 24 bits are controlled by IEEE and used to allocate a unique number to each manufacture, whereas the latter 24 bits are used by each manufacturer to assign a unique number to each card.	
NDPS	The acronym for Novell Distributed Print Services. This provides a high perform- ance printing solution in NDS environments. Using NDPS for the print server sim- plifies and automates complicated management activities related to printer use. For example, you can print to a desired printer or automatically download the printer driver for a newly installed printer. NDPS print servers also integrate man- agement related to the network printers.	
NDS	The acronym for Novell Directory Services. This allows the centralized manage- ment in a hierarchical structure of shared resources such as servers, printers and users information on the network, as well as the access privilege and other infor- mation related to the users.	
NetBIOS	The abbreviation for Network Basic Input Output System. This is a communica- tion interface developed by IBM.	
NetBEUI	The abbreviation for NetBIOS Extended User Interface. This is a network protocol developed by IBM. NetBEUI enables you to construct a small-scale network simply by configuring computer names.	
NetWare	A network operating system developed by Novell. This uses NetWare IPX/SPX for the communication protocol.	
Nprinter/ Rprinter	A remote printer support module used when using a printer server in NetWare environments. Rprinter is used for NetWare 3.x, and Nprinter for NetWare 4.x.	
OHP/OHT	A transparent sheet used for OHP (Overhead projector). This is used for presen- tations.	
OS	The acronym for Operating System. This is base software used to control the system of a computer. Windows, MacOS, or UNIX is an OS.	
PDF	The acronym for Portable Document Format. This is an electronically formati document with file extension of ".pdf". PDF is a PostScript based format, and be viewed using Adobe Acrobat Reader, a free viewer software.	
PDL	The acronym for Page Description Language. This is a language used to instruct a page printer about images being printed on each page.	
PostScript	A typical page-descriptive language developed by Adobe and commonly used for high quality printing.	
PPD	The acronym for PostScript Printer Description. This is a file with the description of resolution, available paper sizes, and other information specific to a PostScript printer model.	

Term	Description	
Proxy server	A server that is installed to act as an intermediary connection between each client and different servers to effectively ensure security over the entire system for In- ternet connections.	
PServer	A print server module available in NetWare environments. This module monitors, changes, pauses, restarts, or cancels print jobs.	
RIP	The acronym for Raster Image Processor. RIP extracts picture images from text data created using PostScript or other page description language. This processor is usually integrated into a printer.	
RGB	The acronym for Red, Green, and Blue. The RGB are the primary three colors used for monitor and other devices, producing any of the full colors by changing their brightness ratio.	
Samba	UNIX server software which uses SMB (Server Message Block) to make UNIX system resources available to Windows environments.	
SLP	The acronym for Service Location Protocol. This is a protocol that provides ca- pabilities such as finding services or automatic client configuration on the TCP/IP network.	
SMBThe acronym for Server Message Block. This is a protocol for sharin printers mainly over the Windows network.		
SMTP The acronym for Simple Mail Transfer Protocol. It is a protocol used to or transfer E-mail messages.		
SNMP The acronym for Simple Network Management Protocol. This is a m protocol in the TCP/IP network environments.		
TCP/IP	The acronym for Transmission Control Protocol/Internet Protocol. It is a de factor standard protocol widely used for the Internet. An IP address is used to identify each network device.	
TrueType	A type of outline font developed by Apple and Microsoft, and currently used as a standard font type for Macintosh and Windows. This type of font can be used both for display and printing.	
USB	The acronym for Universal Serial Bus. This is a general-purpose interface defined for connecting a mouse, printer, and other devices with a computer.	
WINS	The acronym for Windows Internet Naming Service. This is a service, available in Windows environments, to call the name server responsible for conversion be- tween a computer name and an IP address.	
XPS	The abbreviation for XML Paper Specification. This is one of the electronic doc- ument formats developed by Microsoft Corporation. It is first supported in Win- dows Vista.	
Outline font	A type of fonts represented using lines and curves to display an outline of a char- acter. Larger-size characters can be displayed on a screen or printed with no jag- ged edges.	
Uninstallation	To delete software installed on a computer	
Ethernet	A standard for LAN transmission lines.	
Print job	A print request transmitted from a computer to a printing device.	
Install	To install hardware, operating systems, applications, printer drivers, or other software on to a computer.	
Web browser	Software used to view Web pages. Typical Web browsers include Internet Explorer and Netscape Navigator.	
Resolution	The resolution value indicates how much detail of an object can be reproduced precisely on an image or a print matter.	
Color matching	A technology for minimizing the difference in colors among different devices such as scanners, displays and printers.	
Brightness	Brightness of a display or other screen.	
Queue name	 A name assigned to each device for allowing printing to the device via network. A logical printer name required for LPD/LPR printing. 	

Description
A printer connected to a server on the network and configured to be used by mul tiple computers.
A computer using services provided by servers via the network.
A form of presenting monochrome image by using the gradation information shift ing from black to white.
Hardware and software used as the point where a network is connected to a net work. A gateway not only connects networks but also changes data formats, ad dresses, and protocols according to the connected networks.
A value used to divide a TCP/IP network into small networks (subnetworks). This is used to identify how many higher-order bits of an IP address are used for the network address.
A type of fonts used for displaying characters and symbols on a CRT or other monitor.
The acronym for Simultaneous Peripheral Operation On-Line. Data to be output to a printer is not sent directly to the printer, but is temporarily stored in another location. The stored data is then sent collectively to the printer.
A feature that allows documents sent from the printer driver to be printed simply by placing your finger or IC card on the authentication unit connected to the print er when the user authentication is enabled. In order to use the Touch & Print fea ture, an authentication unit must be connected to this machine, and the vein patterns or the ID of the IC card for each user must be registered.
Software that works as a bridge between a computer and a peripheral device.
A large capacity storage device for storing data. The data is retained even after the power is turned off.
A type of network where the connected devices can be communicate with each other without using a dedicated server.
A mechanism used to immediately detect a peripheral device when it is plugged into a computer, and search for an appropriate driver automatically, so that the device becomes operable.
Software that works as a bridge between a computer and a printer.
A memory area temporarily used for processing data of print jobs.
A software system used by a spooler to save generated print jobs.
A type of communication format used in NetWare environments. For mutual com munication, the same frame type is required.
A function allowing you to view a result image before being actually processed for printing or scanning.
A rule enabling a computer to communicate with other computers or peripherals
Attribute information. When using a printer driver, different functions can be con figured by utilizing its properties. By using properties of a file, you can check the attribute information about the file.
A color attribute file. This contains overall input and output correlation data of pri mary colors, specifically used by the color input and output devices to reproduce colors.
The name used to identify a device on a network.
A storage device used for storing data temporarily. Some types of memory retain data even after the power is turned off, while others not.

DIRECTIVE 2002/96/CE ON THE TREATMENT, COLLECTION, RECYCLING AND DISPOSAL OF ELECTRIC AND ELECTRONIC DEVICES AND THEIR COMPONENTS

INFORMATION

1. FOR COUNTRIES IN THE EUROPEAN UNION (EU)

The disposal of electric and electronic devices as solid urban waste is strictly prohibited: it must be collected separately.

The dumping of these devices at unequipped and unauthorized places may have hazardous effects on health and the environment.

Offenders will be subjected to the penalties and measures laid down by the law.

To dispose of our devices correctly:

- a) Contact the Local Authorities, who will give you the practical information you need and the instructions for handling the waste correctly, for example: location and times of the waste collection centres, etc.
- b) When you purchase a new device of ours, give a used device similar to the one purchased to our dealer for disposal.

The crossed dustbin symbol on the device means that:

- when it to be disposed of, the device is to be taken to the equipped waste collection centres and is to be handled separately from urban waste;
- The producer guarantees the activation of the treatment, collection, recycling and disposal procedures in accordance with Directive 2002/96/CE (and subsequent amendments).

2. FOR OTHER COUNTRIES (NOT IN THE EU)

The treatment, collection, recycling and disposal of electric and electronic devices will be carried out in accordance with the laws in force in the country in question.
